The 43% Horse Racing System!

by Denny Nash

This horse racing system will show you how to beat the "public" and almost every handicapper or tipster you'll ever meet.

Before you can appreciate and understand how to make a living betting horses, it is appropriate to review first the fundamentals of horse betting and this horse racing systems that is 100% proven.

First understand that this is not another one of those redundant online articles that tells you, "the best way to make money betting on horses is to have a good horse racing system". Wow. Now is that insightful information or what!?

This horse racing system article is probably going to be the most valuable this you'll ever read. Because you'll be able to take the words written here and immediately go bet on horses and start winning money. This system is 100% legal and has been around for decades. Like other horse racing systems, some are good and some are not so good. But one thing is for sure. This one is here to stay, and it is an explosive growth system that can compound your profits fast!

So what's the big attraction to this horse racing system? Well, first of all it represents a wonderful opportunity for the "little fella" or beginner with little or no knowledge about the sport, to make a whole lot of money! Many earn well into the large 6 figures (over \$1,000,000)! How is this possible? By making wise wagers, and compounding their profits. But more on that later.

Now, it's a well-known fact that there are very few handicappers and even fewer horse racing systems that can come close to beating the public win percentage of 33% with any consistency. What the public win percentage means is, whichever horse is the betting favorite (or the horse the public bets the most money on in a race) will win on average 33% of the races. Believe it or not that figure holds true pretty much all over the world!

So, just follow the public and get rich right? You can't lose! Wrong. The problem is that the average payout for a favorite is approximately 6/5 odds or \$4.40 for every \$2 wagered.

That means if you bet on 1,000 races and won 33% of your bets you would have wagered \$2 to win on each race for a total of \$2,000. You would have won 330 wagers at an average of \$4.40 for a total of \$1,452. That's a loss of \$548 or 27.4% of your hard-earned cash.

Notice in the previous paragraphs I stated the public's winning average is 33%. That's where we are going to start. We want to build off of that, and RAISE it 2-3 levels! In

other words, you are going to end up with an automated horse racing system that is duplicative over and over again! Here's how simple it is:

- 1.) Look at the odds board and find out who the 1st two betting favorites are in any race. Yes I said ANY race.
- 2.) If the 2nd choice is 3-1 odds or more AND every other horse is 4-1 or HIGHER...you bet on the FAVORITE to WIN only (regardless of the odds).
- 3.) If the 2nd choice is LESS than 3-1. Do NOT bet this RACE
- 4.) If the 3rd choice is 3-1 odds, or less. Do NOT bet this RACE.

There you have it. You have now learned the secret to cashing 43% or MORE of your WIN wagers.

So now you can get rich right? Hmmmm let's see. If you wager on 1,000 races and win 43% at a 6/5 average payout, how much do you profit?

\$2,000 wagered. \$1,892 collected. That's a small loss of \$108 or 5.4%.

What if there was a way to wager on the favorite that would compound your winning time and time again? Well there is.

Making bets with real money is the kiss of death for most people! Let's face it. Most people hate to think, can't wait, and don't want to exercise restraint! But don't fret. Understand that if you are going to make money gambling, you "gotta" manage your own money. There is no other choice!

Another unique problem with "gamblers" is that they find it difficult not to try a million different things. That is, they jump from one horse racing system to the next, which one is the right one? Where do you find THE system that's going to make you rich TODAY not in 1 year? Patience is not a virtue of the gambler.

Below I'm going to show you EXACTLY how to PROVE every word I've written here is gospel truth. Check out the statistics for yourself. Don't buy any thing, or bet \$1 until you KNOW this really works.

And after that decide how much you have to risk - because life is a risk. Anyone who tells you that his or her horse racing system is safe and risk-free is full of it. Nothing in life is for sure. And besides the sure thing is over-rated.

If you want to put this system into high-gear you need the right betting strategy to maximize profits. I highly recommend you get my book "Bet to Win for a Living" <http://stores.lulu.com/jcpubs> or www.amazon.com and use the wagering strategy in there.

It's been tested over and over and it WORKS. POINT BLANK...THIS SYSTEM WILL WORK!

And as you can see, this is very low risk in that you are collecting almost a full half of all your wagers. What other horse racing system can pick over 40% WINNERS?

The most you will lose is 9 races in a row. And that's very very rare! The wagering system takes that into consideration and locks in your profits nice and tight.

Let's Summarize

If you want to start on a shoestring, you can. But before anything else- prove this horse racing system works. Here's how:

- a.) Go to <http://www.equibase.com>
- b.) Click the RESULTS button
- c.) Click the FULL CHARTS link
- d.) Go through all the tracks and check out the results using the horse racing system above.
- e.) Get your copy of "Bet to Win for a Living" and use the wagering system in there to multiply a simple bankroll over and over into a massive money making machine.

By using this proven horse racing system, you will see just how easy it is to beat the public, and use the betting strategy in, "Bet to Win for a Living". Start small and watch your profits multiply as if by magic. This is truly easy money!

HERE'S TO YOUR SUCCESS!
