## Electric Hydraulic Scissor Lift Tables

Full featured electric hydraulic scissor lift tables are used by all types of manufacturing and warehouse facilities. Safety features include: electric toe guard to protect pinch points during lowering of the table, brass velocity fuse to maintain platform height regardless of hydraulic pressure, 24V AC push-button hand control, maintenance prop, and upper travel limit switch to stop table at maximum height, reducing motor wear. 2HP, 460V, 3 phase, 60 Hz totally enclosed motor standard, other voltages available. 3000 psi hydraulic component rating.

QUICKSHIP (460V 3 PHASE ONLY)							
MODEL NUMBER	PLATFORM SIZE (W x L)	LOWERED HEIGHT	RAISED HEIGHT	CAPACITY (POUNDS)	VOLTAGE PHASE	NET WT. (POUNDS)	LIST PRICE EACH

OTHER MOTOR VOLTAGE & PHASE ADD \$160.00 LIST & ONE ADDITIONAL WEEK TO LEAD TIME, model EHLT-VCC DC-20/FC-70

### Model Number Format

EHLT - (width)(length) - capacity - raised height

#### STANDARD FEATURES

- Patented Pinch Point Perimeter Guards for OSHA Compliance
- Fused 24 Volt Push Button Control on 8 ft. Cord
- Adjustable Upper Travel 24V Limit Switch
- Internal Brass Velocity Fuse
- (2HP) 56 Frame Electric Motor
- Pressure Plated Pump & Manifold System
- Robust Heavy Capacity Tables
- Displacement Style Hydraulic Cylinder
- State-of-the-Art Lifetime Lubricated Bearings
- Integral Maintenance Prop

LINE-X® spray on Polyurea/Polyurethane coating available on most Scissor Tables. Contact factory for additional information.

- Optional Foot Control model EHLT-FC, \$88.00 List

## Options for Electric Hydraulic Scissor Lift Tables

### Mechanical Options

- REMOVABLE 42" HIGH HANDRAIL INCLUDING 21" MIDRAIL & NON-REMOVABLE TOE-BOARD ..... \$24.00 LIN-FT./\$350.00 MIN.
- NON-REMOVABLE 42" HIGH HANDRAILS INCLUDING 21" MIDRAIL AND TOE-BOARD .....\$19.00 LIN-FT./\$300.00 MIN.
- 42" HIGH SELF LOCKING GATE UP TO 6 FEET WIDE ..... \$157.00 EACH
- LINK CHAIN CLOSURE GATE WITH SNAP HOOK ENDS FOR MAXIMUM 6 FEET OPENING ..... \$82.00 EACH
- 4-WAY ANTI-SKID STEEL TREADPLATE DECK/PLATFORM ..... \$210.00 EACH
- SEMI-PORTABILITY OPTION (INCLUDES TWO RIGID WHEELS WITH A TWO WHEEL DOLLY JACK) ..... \$325.00 EACH
- FULL-PORTABILITY OPTION FOR 1,000 TO 3,000 LBS. CAPACITY UNITS UP TO 90" LONG. (INCLUDES TWO RIGID & TWO SWIVEL CASTERS) WITH A NON-REMOVABLE PUSH HANDLE, REINFORCED FRAME AND FOOT OPERATED FLOOR LOCK) ..... \$732.00 EACH
- NFPA-701 FIRE RETARDANT ACCORDION SKIRTING - CUSTOMER INSTALLED (INCLUDES HARDWARE) ..... \$10.00/SQUARE FOOT
- NFPA-701 FIRE RETARDANT ACCORDION SKIRTING - FACTORY INSTALLED ..... \$14.00/SQUARE FOOT  
(PLEASE NOTE: SKIRTING DOES NOT ALLOW FOR ELECTRIC TOEGUARDS)
- 12" LENGTH SPLIT HINGED BRIDGE WITH RUNOFF GUARDS AND LIFTING CHAINS (72" WIDE)  
STEEL..... \$325.00 EACH  
ALUMINUM..... \$630.00 EACH
- 18" LENGTH SPLIT HINGED BRIDGE WITH RUNOFF GUARDS AND LIFTING CHAINS (72" WIDE)  
STEEL..... \$360.00 EACH  
ALUMINUM..... \$710.00 EACH
- CAROUSEL (CA-SERIES) MOUNTING TO DECK (PRICING DOES NOT INCLUDE CAROUSEL) ..... \$95.00 EACH
- POWERED CAROUSEL ELECTRIC HYDRAULIC DRIVEN, FIXED-SPEED, HAND CONTROL, MIN. DECK SIZE 54" x 54",  
MAXIMUM CAPACITY 4,000 LBS. (ADD 3-1/2" TO LOWERED HEIGHT (WEIGHT 210 LBS.) ..... \$2,985.00 EACH
- AIR CASTER BEARINGS, MANUAL ROTATION CAROUSEL (ADD 3" LOWERED HEIGHT) ..... \$3,367.00 EACH

### Control Options *(available for most powered products)*

- ADDITIONAL 24V PENDANT HAND CONTROL ON 8 FOOT COIL CORD  
2 PUSH-BUTTON CONTROL ..... \$87.00 EACH  
4 PUSH-BUTTON CONTROL ..... \$158.00 EACH
- 24V NEMA 4 WALL MOUNT CONTROL STATION  
2 PUSH-BUTTON CONTROL ..... \$112.00 EACH  
4 PUSH-BUTTON CONTROL ..... \$180.00 EACH
- ADDITIONAL 24V FOOT CONTROL WITH SAFETY GUARD ON 8 FOOT CORD  
2 PEDAL CONTROL FOR LIFT-HOLD-LOWER CIRCUITS ..... \$148.00 EACH  
4 PEDAL CONTROL FOR LIFT-AND-TILT CIRCUITS ..... \$289.00 EACH
- WIRELESS REMOTE CONTROL  
2-BUTTON CONTROL FOR LIFT-HOLD-LOWER CIRCUITS ..... \$660.00 EACH  
4-BUTTON CONTROL FOR LIFT AND TILT CIRCUITS ..... \$660.00 EACH

### Motor/Power Options *(available for most powered products)*

- 3 HP / 1-PHASE / 115/208-230V MOTOR @ 1½ GPM EXTERNAL - UPGRADE FROM 2 HP (35 AMP DRAW AT 115V) ..... \$1,169.00 EACH
- 6.5 HP / 3-PHASE / 208/230-460V MOTOR @ 4 GPM (INCLUDES 15 GALLON TANK) ..... \$1,103.00 EACH
- NEMA-4 UPGRADE FOR WASH DOWN APPLICATIONS (INCLUDES SPECIAL MOTOR AND ENCLOSURE) ..... \$342.00 EACH
- ROTARY AIR/OIL POWER UNIT (WARRANTY VOID IF USED W/OUT FILTER - REGULATOR - LUBRICATOR (FRL)) (Call factory for decibel rating)  
(AIR REQUIREMENTS 70 CFM @ 70 PSI)  
2-BUTTON CONTROL FOR LIFT-HOLD-LOWER CIRCUIT (INCLUDES TOEGUARDS IF STANDARD) ..... \$634.00 EACH  
4-BUTTON CONTROL FOR LIFT-AND-TILT CIRCUITS ..... \$1,310.00 EACH  
2 PEDAL CONTROL WITH SAFETY GUARDS ..... \$810.00 EACH  
4 PEDAL CONTROL WITH SAFETY GUARDS ..... \$1,640.00 EACH  
1/2" NPT FILTER-REGULATOR-LUBRICATOR (FRL) - VOID WARRANTY IF USED WITHOUT ..... \$320.00 EACH
- RECIPROCATING AIR/OIL POWER UNIT, FOOT TREADLE CONTROL, FOR 1-3K CAPACITY (NO TOEGUARDS) ..... (-)\$150.00 EACH  
1/4" NPT FILTER - REGULATOR - LUBRICATOR (FRL) - VOID WARRANTY IF USED WITHOUT (15CFM @ 100 PSI) ..... \$125.00 EACH
- HAZARDOUS LOCATION POWER UNIT FOR LIFT-HOLD-LOWER CONTROL (REMOVEDLY LOCATED) ..... \$3,820.00 EACH  
(NO TOEGUARDS; **DIVISION 2 LOCATIONS ONLY**)

### Miscellaneous Options *(available for most powered products except where noted)*

- WARNING LIGHT - OPERATES WHEN UP/DOWN BUTTON IS PRESSED ..... \$285.00 EACH
- WARNING BEEPER - OPERATES WHEN UP/DOWN BUTTON IS PRESSED ..... \$195.00 EACH
- HIGH CYCLE BEARING PACKAGE (EHLT SERIES) - AVAILABLE ON TABLES WITH A 36" OR 48" VERTICAL TRAVEL NOT EXCEEDING A CAPACITY OF 4,000 POUNDS (ADDS 3" TO LOWERED HEIGHT) (EHLT only) ..... \$2,720.00 EACH

CONTACT MANUFACTURER FOR OTHER OPTIONS SUCH AS: 2-SPEED PUMPS, ADDITIONAL LIMIT SWITCHES, APPROACH RAMPS, PAINT OPTIONS, REMOVABLE TOEBOARDS, CONVEYORS, RAILS OR TURNABLES (MANUAL OR POWERED) ATTACHED TO DECK OR SPECIAL DECK SIZES.

## Manual Built-In Carousel for Scissor Tables

Position pallets, boxes, or crates without ever stepping around the table. This sleek flush mounted carousel smoothly rotates 360°. Easy to use operation. Capacity is 4,000 lbs. Carousel adds 1" to scissor table service range. Carousel diameter is 45". Platform size is 48" x 48". Scissor table not included. Option for new table purchase only.

MODEL NUMBER	DESCRIPTION	LIST PRICE EACH
ROTATE	MANUAL BUILT-IN CAROUSEL FOR SCISSOR TABLE	\$850.00

DC-20/FC-70

DVD or VIDEO AVAILABLE

## Accordion Skirting

Accordion Skirts have a functional purpose as well as a safety purpose. Skirts comply with the OSHA pinch point specifications. The functional advantage is minimizing dirt and debris accumulation under the platform. Dirt can contaminate electrical and hydraulic components. Life expectancy of both can be substantially reduced by this contamination. Debris such as raw materials, boards, or pallets can restrict the scissor or table movement. Accordion skirts serve to keep debris from damaging the operating mechanism, hydraulic components, or electrical parts. Safety is enhanced by keeping arms, legs, fingers, and toes out from under the table. Standard electric toe-guards are not included when scissor table is fitted with accordion skirt option.

### TABLE SPECIFICATIONS:

- 1) TABLE WIDTH, W = \_\_\_\_\_"
- 2) TABLE LENGTH, L = \_\_\_\_\_"
- 3) TABLE RAISED HEIGHT, H = \_\_\_\_\_"
- 4) TABLE LOWERED HEIGHT, D = \_\_\_\_\_"

### CALCULATION FORMULA: (3" convolutions)

All Dimensions are in Inches

W = Width of Platform      L = Length of Platform      H = Raised Height

### ACCORDION SKIRTING

**CUSTOMER INSTALLED (including hardware).....\$10.00/SQ. FT.**

### ACCORDION SKIRTING

**FACTORY INSTALLED (includes extra packaging) .....\$14.00/SQ. FT.**

### FORMULA:

$((W + W + L + L) \times H) \div 144 = \text{Square Feet}$

Square Feet x \$10 (customer installed) or \$14 (factory installed) = List Price

### WEIGHT:

0.5 lbs./ft<sup>2</sup>

### REPAIR KIT FOR ACCORDION SKIRTING

**model AC-RK.....\$35.00 LIST**

*Rigid PVC and Roller Curtains Also Available - Contact Factory*

OUTSIDE MOUNTING (STANDARD)

WIRELESS REMOTE CONTROL IS FACTORY INSTALLED

## Wireless Remote Controls

Put the power in your hands with the Wireless Remote Control System, series RC-460. This lightweight, two-button, remote control gives you the freedom to control your scissor table from a range up to 150 feet (range can be adjusted for optimum signal strength and can be reduced if required). Unit is also available in a four-button model for lift and tilt tables. The remote control measures 4" wide x 6" high x 2" thick.

Approved to meet part 15 of the Federal Communications Code. Designed to prevent crosstalk and false triggering from stray radio frequency. Scissor table not included.

MODEL NUMBER	DESCRIPTION	NET WT. (POUNDS)	LIST PRICE EACH
RC-460-2	2-BUTTON CONTROL (LIFT-HOLD-LOWER CIRCUIT)	1	\$759.00
RC-460-4	4-BUTTON CONTROL (LIFT AND TILT CIRCUIT)	1	759.00

RETROFIT AVAILABLE - CONTACT FACTORY

## Integral Scale for Scissor Tables

- Validate Number of Pieces or Parts
- Know Exactly How Much Weight is on Your Table
- No Holes or Bolting Required
- Installs and Removes in Seconds
- Expedite Your Shipping & Palletizing Process
- Available in Any Size to Fit an Existing Table (Rests on Top of Table)
- Adds approximately 3" to Overall Height
- Scale Functions: Zero Weight and Tare Weight
- Weighing Units: Pounds or Kilograms
- Scale Capacity: 5,000 lbs.
- Mettler Toledo™ Scale
- Scissor Table Not Included

INTEGRAL SCALE  
model SCALE

MODEL NUMBER	DESCRIPTION	WEIGHT (LBS.)	LIST PRICE EACH

## Auto Sense and Height Index with Integral Scale

- Load and Unload Heavy Loads Easier, Faster and More Efficiently
- Minimum Lifting, Bending and Reaching
- One Touch Auto Height
- Fully Automatic Controller
- Combines precise positioning and weighing capabilities in a single unit
- Fully programmable and automatic:

- Set height function:** Programmable up to four preset heights.
- Increment Function:** When X amount of weight is removed, the table will raise Y inches. 2X amount of weight is removed, the table will raise 2Y inches.
- Decrement Function:** When X amount of weight is added, the table will lower Y inches. 2X amount of weight is added, the table will lower 2Y inches.
- Scale Functions:** Zero weight, Tare (net) weight, and Tare (gross) weight. Raise/Lower Push Buttons on Keypad

- Fully integrated controller with a large display - 2 lines of 20 characters with display function (messages and values)
- A 16-button keypad for programming, editing, and modifying - using all 16 buttons on the panel display
- Scale Capacity: 5,000 lbs.
- Adds approximately 3 inches to the overall lowered height
- Hybrid technology linear sensor is used to control positions at any preset height
- Scissor Table Not Included

AUTO SENSE  
& HEIGHT INDEX  
model SENSE

## Programmable Height

Eliminate unnecessary bending and "land control jogging" by presetting multiple working heights at the touch of a button

- Set height function: Programmable up to 4 preset heights
- Incremental height adjustment for jogging lift at preset increments
- Raise/lower push button on the keypad
- Fully integrated controller with LCD display
- A 15-button keypad for programming, editing, and modifying all 15 buttons on the panel display
- Powered by a 24V DC motor
- Excellent for repeat repositioning applications
- Hybrid technology linear sensor is used to control positions at any preset height
- Scissor Table Not Included

## Rotary Air/Hydraulic Scissor Lift Tables

Utilize the efficiency of factory air to power this lift table. Simply connect a 1/2" NPT air line, filter, regulator and lubricator and you now have the most efficient lift table manufactured. Features pneumatic upper travel limit switch, toe guards, internal brass velocity fuse, hinged maintenance prop, two button hand control and state-of-the-art precision pins and bearings.

MODEL NUMBER	PLATFORM SIZE (W x L)	LOWERED HEIGHT	RAISED HEIGHT	CAPACITY (POUNDS)	NET WT. (POUNDS)	LIST PRICE EACH

## Shorty Scissor Lift Tables

Built with the same quality as all our lift tables, the EHLTS and EHLTSD maximize safety and durability. Designed to raise products up to an ergonomic working height. When tight spaces are what you have, consider a Shorty Scissor Table. Available in both a single and double leg style these tables offer smaller deck sizes customized to your space requirements. Design features include full perimeter pinch point guard and emergency internal brass velocity fuse. External power unit and hand control standard.

Model Number Format: **EHLTS - (width)(length) - capacity - raised height**

## Double Scissor Lift Tables

Achieve the extra reach you're looking for with our Double Scissor Lift Tables. These full featured electric hydraulic scissor lift tables are used by all types of manufacturing and warehouse facilities. Safety features include: electric toe guard to protect pinch points during lowering of the table, brass velocity fuse to maintain platform height regardless of hydraulic pressure, 24V AC push-button hand control, maintenance prop, and upper travel limit switch to stop table at maximum height reducing motor wear. 2 HP, 460V, 3-phase, 60 Hz totally enclosed motor standard, other voltages available. 3000 psi hydraulic component rating.

Model Number Format: **EHLTD - (width)(length) - capacity - raised height**

TRAVEL TIME BASED ON 460V THREE-PHASE POWER

DC-20/FC-70

## Portable Scissor Lift Tables

Heavy-duty powered lift tables are designed to transport and elevate your heaviest loads. A heavy-duty 12V DC power unit with deep cycle battery and an on-board battery charger is standard, a battery charge indicator is optional. Features 8" phenolic casters (2 swivel and 2 rigid), floor lock, and patented electric pinch point guards. Push buttons to raise and lower lift, located on power unit and in the pendant-style push-button control, are standard. Key-operated ON/OFF control for better security is built into the power unit. Minimum frame width is 34". Add 25" to platform length for the overall length.

### Model Number Format PST - (width)(length) - capacity - raised height

## Power Traction Drive System

Reduce worker fatigue and injury with the Portable Traction Drive Option. This factory installed option is available on portable equipment including the Portable Scissor Table, Pallet Master/Pallet Server, Tilt Master, and High Rise Lift Truck. An alternative to costly fork trucks, the PTDS includes a combination throttle / direction butterfly style controller, an adjustable yoke and an auto reverse emergency "belly" switch. This state of the art option allows a single operator to safely and ergonomically transport products. Power pack is 42" wide. Maximum speed is 2.5 m.p.h.

PORTABLE SCISSOR TABLE WITH PTDS OPTION

## Air Bag Scissor Lift Tables

Air Bag Scissor Lift Tables use factory air for clean, dependable, maintenance free operation. Designed to raise products up to an ergonomic working height. Safety features include pressure relief and pinch point guard. Must be used in conjunction with a filter/regulator. We do not recommend the use of a lubricator. Includes hand held control with up and down button mounted on 8 ft. cord. Incoming air must be clean, dry and regulated to 80 psi (min.). Requires 1/2" incoming airline. Standard features are adjustable upper travel limit valve, state-of-the-art lifetime lubricated bearings and maintenance prop. Other sizes available, contact factory.

## Foot Pump Scissor Lift Tables

Foot pump activated lift tables. Used by all types of manufacturing and warehousing facilities. Features torsion tubes for side to side stability, pressure flow control valve for controlled lowering, and foot pump. Optional power-lift feature available (on-board charger included on DC option). Scissor tables can be made mobile with the optional handle and caster kit. Rugged welded steel construction. Painted blue finish.

## Ground Lift Scissor Tables

Designed for use when fork trucks are not available. Pallets can be loaded onto platform with pallet trucks and raised to an ergonomic working height. Safety features include; entry-side electric toe guard to protect pinch points during lowering of the table, velocity fuse to maintain platform height regardless of hydraulic pressure, foot control, maintenance prop, and upper travel limit switch to stop table at maximum height reducing motor wear. 2HP, 208-230/460V, 3-phase, 60 Hz totally enclosed motor is standard, other voltages available. Remote power unit can be located up to eight feet away from table. 3000 psi hydraulic components rating. Optional accordion skirting available, contact factory.

## Low Profile "U" Type Electric Lift Tables

The open center on the "U" Type Electric Lift Tables enables a pallet truck to place a load on the platform. Units feature an external power pack equipped with a pressure relief valve that prevents overloading and a flow control valve that controls the lowering speed. Remote power pack comes complete with steel cover to protect the motor from dust and debris. Raise and lower the unit using the UP and DOWN push-buttons on the 24V control box. Safety features include electric toe guards, velocity fuse in cylinders, safety maintenance props and an emergency stop button on the control box.

## Lift & Tilt Scissor Tables

Performs both lifting and tilting operations. 45° tilt standard. Restraining chain and 12" high lip to keep the load in place during tilting. Safety features include: electric toe guard to protect worker from pinch points during lowering of table, velocity fuses to stop travel due to loss of hydraulic pressure, 4 push-button hand pendant control on an 8 foot coil cord, upper limit switch to stop travel at maximum height reducing motor wear, and maintenance prop. End tilt standard, side tilt available. Optional accordion skirting available for both the lifting and tilting portions of the table, contact factory.

## Single Scissor Lift & Tilt Tables

Designed to position containers within easy reach of assembly line workers and machine operators. This unique design reduces fatigue by minimizing repetitive bending and stretching required to obtain components from containers. 96" x 48" unit accommodates (2) 48" x 48" containers, ideal for parts transfer and assembly. Platform includes a 12" high lip on tilt side. A selector pedal allows the operator to lift while tilting, or tilt then lift. 2HP, 208-230/460V, 3-phase, 60 Hz totally enclosed motor is standard, other voltages available. Other standard features include: a two-button handheld control, integrated maintenance lock, pressure plated pump, pressure compensated flow valve, lowering valve, independent oil return, and an adjustable upward travel limit switch. Unit must be lagged to floor.

## Portable Uni-Tilts

Now you can transport your tilter from workstation to workstation quickly and easily with a fork truck. This unique design reduces fatigue by minimizing repetitive bending and stretching required to obtain components from containers. Platform includes a 12" high lip on tilt side. A selector pedal allows the operator to lift while tilting or tilt then lift. 2HP, 208-230/460V, 3PH AC power unit with hand pendant control is standard, other voltages available. Features the same standard features as our original Single Scissor Lift and Tilt Table above.

## Lift & Tilt Workstation Tables

Design of unit allows platform to lift & tilt at the same time for easy operation. Maximum tilt angle is 45° for better ergonomics and operator comfort. Service height range is 10" to 24" (to lowest point of platform surface). Platform end includes 12" high full-width lip to support containers. Internal power unit includes electric motor, hydraulic pump, and control box. Operates with 24V AC hand control on 8 ft. cord. Choose 115/230V single phase or 208/230/460V three phase power. Welded steel construction with yellow painted finish.

## Hinge & Sliding Tilt Tables

Hinge and Sliding Tilt Tables offer the rugged durability of the standard Efficiency Master line of tilters, plus they offer an extra low platform height. A 12" lip without side gussets allows for loading and unloading on three sides. Standard features include a 2 HP 208-230/460V AC power unit with a 24 volt two button hand held pendant control, other voltages available. A pressure plated pump coupled to an application specific manifold features counterbalanced valves and modulated flow control for maximum efficiency.

The Sliding Tilt Table incorporates a patented sliding link-tilt design for maximum stability while occupying minimum space. As the table is tilted, the front edge of the container moves away from the operator. The center-of-gravity of the load remains closer to the center of the frame.

MODEL NUMBER	DESIGN	PLATFORM SIZE (W x L)	CAPACITY (POUNDS)	LEVEL HEIGHT	MAXIMUM TILT	NET WT. (POUNDS)	LIST PRICE EACH

## Efficiency Master Tilt Tables

The model EM1-200 tilts pallets, crates, boxes, or baskets 45° to facilitate easy container loading or unloading. Tables feature all welded steel construction for years of durability. Unique design minimizes pinch points to meet OSHA requirements. Units are equipped with an industrial quality, 56 frame 2 HP motor. This motor delivers best torque with minimal amperage draw for maximum life. Standard voltage is 208-230/460V 3 phase, other voltages available. A 24V push button hand control is standard.

The model EM1-500 incorporates all of the same quality features found in the Series EM1-200 but features a full 90° of tilt. Unit is ideal for upending products in shipping and receiving operations. Standard with double acting cylinder for controlled tilt and return. Unit must be lagged to floor.

## Ground Tilter

The Ground Tilter is the best product for tilting applications which require the use of a pallet truck for loading and unloading. Rotate containers up to 45° from floor level to provide better access to parts in containers. Platform includes a 17" high lip on tilt side. A removable positioning bar is provided for use with smaller containers. Designed with worker safety in mind, pinch point guards are provided on all four sides of the unit. 2HP, 208-230/460V motor standard, other voltages available. Remote power unit with a protective cover measures 24"W x 24"L x 8"H. Hand pendant control standard. Optional foot control available.

## Bench Top Tilters

Heavy-duty steel Bench Top Tilters tilt loads from 0° to 45° (3" lip). Easily attached to most industrial table tops, work benches, and mobile lift tables of sufficient load capacity and surface size. Unit slides back as it tilts to maintain the center of gravity over the frame. Manual units need to be adjusted only when unloaded. Linear Actuated units are equipped with a push-button hand pendant control, located on an 8 foot cord. Flat base plate with slotted holes for installation.

## Air Corner Tilters

The floor level airbag powered tilter provides ergonomic loading and unloading of bulk containers, gaylords, or crates. Pallet truck and fork truck accessible. Tilts up to 45°. Activated by a hand operated control lever or foot pedal. By adjusting the air regulator to a predetermined pressure, the air bag inflates tilting the container automatically as it is unloaded. As the container becomes lighter, it automatically tilts and the material shifts to the corner of the container where it can be easily removed by manual or mechanical means. The adjustable regulator is factory preset to begin rotating the container when the weight reaches approximately 900 lbs. Pressure is easily adjustable for the weight of your application.

## Manual Tilt Master

Lift, tilt, and transport crates, boxes, and pallets with an open bottom. Designed to give the user an ergonomically correct position to reach loads easily without the need for bending down or excessively reaching over. Forks can be tilted to 90°. Rolls smoothly on 6" x 2" polyurethane swivel casters with brake and foot protectors. Width between forks is 9½". The overall fork width is 22". The individual fork width is 6½".

## Tilt Master & Tilt Master Straddle

Lift and position filled tote boxes or baskets without the need of a fork truck or lift table using the newly designed heavy-duty Tilt Master. These 90° tilters will function as transporters by moving completed products from work station to work station without waiting for a fork truck.

A folding ergonomic handle for quick and easy maneuverability. Unit has a thin profile to allow the user to get as close to the load as possible. Units roll easily on 8" x 3" phenolic steering wheels. Floor lock standard. Series TM is designed to be used with open bottom pallets or skids only while the Tilt Master Straddle units, series TMS, can be used with virtually any kind of container or pallet. Units are powered with a 12V DC electric motor including an on-board battery charger standard. AC or \*AIR/OIL power units available contact factory (\*filter - regulator - lubricator required). Units come standard with a push-button hand control on an 8 foot coil cord.

## Fork Truck Mounted Trash Can Dumper

Save time and reduce work-related injuries caused by lifting and dumping heavy waste containers. This innovative product will allow a fork truck driver to lift and dump refuse containers weighing up to 1,000 lbs. without ever leaving the seat of the fork truck! Secure dumper to fork truck with safety chain and run cable to driver's seat. Align trash can with dumper and lock into place. Once locked in place, transport trash can to refuse container, align, and pull chain to dump refuse container contents. Only for use with 64 gallon trash can, model TH-64, or approved equal. Fork pockets are 2¼" high by 7¼" wide usable. Steel construction for years of dependable use.

## Trash Can Dumpers

Minimize lifting and dumping heavy trash cans with the rugged all steel Trash Can Dumper. One person can easily and safely empty trash cans weighing up to 300 lbs. into dumpsters. The automatic container clamp securely holds the trash can container. Hand crank or 115V, 1 phase, push button actuation rotates containers to 135° angle (60" dump height) above dumpster. Each unit comes with four casters for easy maneuverability and heavy-duty mesh sides for safety. One Trash Can, model 95-GLT, comes standard with each unit.

## Mobile Tilting Work Tables

Designed to bring work to an ergonomically correct position, helping to foster a more comfortable and productive work environment. Working in a comfortable position also reduces fatigue and risk of injuries. Platform height and tilt angle are manually adjustable, with the exception of model WT-2424-LA, which uses an electric linear actuator with a hand control and 115V AC motor. Four 3½" x 1¼" polyurethane swivel casters (two double locking) allow unit to be transported from one work area to another while loaded. All steel construction.

## Transportable Stacker

This stacker will allow you to lift and move boxes and containers with ease. The unique design will also allow you to load it into the back of your truck or van without the need for heavy lifting or an overhead crane. To load into your truck, raise forks above truck bed and push the unit forward completely over truck bed. Push the lower button and hydraulic system will lower forks to truck bed and then begin to raise the rest of the stacker automatically! Features 12V DC battery power with push-button operation. Includes two rigid and two swivel casters. Steel construction.

## Tote Lifters

Designed to lift open bottom skids, boxes, and baskets. Two operations available: hand pump and 12V DC power with rocker switch to raise or lower. Hand pump design features an ergonomic pump handle with two lifting speeds to accommodate for light or heavy loads. Side stabilizers provide balance to the unit when the load is lifted. Suffix "SS" stands for stainless steel units. Stainless steel units feature nylon wheels.

## Tote-A-Loads

Designed to lift open bottom skids, boxes, and baskets. The manually operated lift is easy to operate. The foot pump operated lift travels approximately 1/2" per stroke. To lower unit simply squeeze the bicycle style grip located on the white push bar. The battery operated lift is ideal for positioning products at workstation height for increased productivity. The up/down lever control is conveniently located on power unit. DC powered units include on-board charger. Polyurethane swivel casters with brake are standard on all units.

## Pallet Master/Servers

Enables one person to easily move fully loaded pallets without the use of a fork truck. Unique straddle design works well with pallets and skids with and without an understructure. Ideal for loading and unloading semi-trailers. 12V DC power standard with on-board charger. Push buttons to raise and lower lift are located on power unit. Hand control on coil cord standard. Key-operated ON/OFF control for better security is built into the power unit. All welded steel construction. Each fork is 4"W x 36"L. Lowered height is 3". Unit moves easily with two rigid and two swivel 8" phenolic casters. Floor lock standard.

## Hydraulic and Winch Stackers

Safe ergonomic alternative to fork trucks at a fraction of the cost. Engineered for smooth operation and outstanding durability, the Hydraulic Stackers handle the following applications: lift and transport skids, bales, and baskets; load/unload trucks, stock shelves, handle dies, molds, or pallets. By combining a power lift with an easy to operate manual push, these Hydraulic Stackers are perfect for maneuvering in tight or congested areas. Complete with on-board charger. Features: 24" horizontal load center, adjustable straddle legs (34" to 50" I.D.), and adjustable forks 6" to 24" (O.D.). 6" swivel phenolic rear casters and 4" phenolic front wheels are standard.

The Compact Winch Stacker is a less expensive ergonomic alternative for lifting pallets of all sizes. This compact unit is perfect for loading/unloading trucks where docks are not available. Features include: safety cage, adjustable straddle legs (34" to 50" I.D.), winch with an automatic braking system, a floor brake to secure unit in place, adjustable forks (6" to 24" O.D.) and 4" swivel phenolic casters/4" phenolic front wheels.

## Versatile Quicklifts

An economical alternative DC powered lift. Ideal for light industrial or commercial applications. Features durable belt over pulley design. This lifter has a high service range and four swivel casters to provide great versatility and convenience. White high density (HDPE) plastic platform is scratch resistant, easy to clean, and retains an attractive appearance. Just 18 seconds for the 57" platform travel. Top wheels facilitate loading into a pick-up or van. Tool tray and remote battery charger is standard.

## DC Powered Quick Lifts

Quiet, lightweight units transport and position loads quickly with just the push of a button. Battery operated. High density polyethylene platform makes these lifts ideal for clean room operations. 9" horizontal load center. Features low profile design for maneuvering in narrow aisles and confined spaces. Poly casters; two swivel and two swivel- locking are standard on all units with the exception of the PEL-400 units. The PEL-400 comes standard with rigid front wheels and swivel rear wheels with locks. 24V battery and 110V AC charger. Powder coat blue finish. A detachable handheld control with coil cord for remote operation is optional. The optional Programmable Height Indexing option allows you to preset multiple working heights at the touch of a button.

## Hand Winch Lift Trucks

Compact lift trucks are designed to lift material to and from shelves, move office equipment, and install ceiling/wall appliances. Constructed of durable steel-and-aluminum. The rugged 4" wide by 1¾" thick steel forks measure 20½" wide by 22" long overall. Operated by a hand-crank winch that features a reversible handle and a hold-down device for securing the carriage during transport. Forks can be inverted to provide two different heights. Two 8" non-marking rear wheels, two 2" front swivel casters.

## Lite Load Lifts

Lift and transport loads from delivery trucks to docks, or use to inventory items on storage systems. Easy to operate, lifts are available in steel or aluminum construction. Units roll smoothly on 6" x 2" mold-on-rubber rear wheels with 2" semi steel front wheels. Four swivel wheels and floor lock are standard on units with the suffix (-4SFL). Located on the handle are two rollers to ease loading into delivery trucks. The platform lifts approximately 1" per winch rotation or foot pump stroke. Horizontal load center is 10". Low Profile units have a deck height of 1/4" with 2" high side lips.

## Hefti-Lifts

User-friendly portable hydraulic lifts provide reliable, powerful lifting when moving and positioning loads. Economical and attractive, they're ideal for commercial or industrial uses. Includes removable chrome platform for operations requiring forks. Manual hydraulic foot pump yields 3/4" of platform travel per stroke. Nonslip chain is used for accurate positioning. Units roll easily on two rigid and two swivel polyurethane casters and include a foot operated brake. Not for use with pallets. All welded steel construction with chrome platform and uprights. Each fork is 4 1/2"W x 2 1/2"H, the fork length is the same as the platform length. Overall fork width is 22".

## Self-Elevating Spring Tables

Self-Elevating Tables are designed to automatically raise or lower as materials are removed or added to the platform, keeping material at an ergonomic work height. These tables increase productivity while reducing potentially harmful bending and twisting motions. The counter balance springs can easily be added or removed to adjust weight-to-height sensitivity. This feature allows the user to conveniently set the table to fit each application. The ETS-230/460 has polyurethane casters while the ETS-840/1120 rolls smoothly on mold-on-rubber casters.

## Auto-Hite Carts

The Auto-Hite Cart raises or lowers as materials are removed or added to the platform, keeping material at an ergonomic work height. Increase efficiency while reducing potentially harmful bending and twisting motions. Carts utilize tension springs which can be adjusted in order to fit each particular application. All steel construction with removable handle. Polyurethane casters are 5" x 2", (2) rigid and (2) swivel with brake. Overall height is 38".

## Hydraulic Post Tables

Foot-operated hydraulic post lift tables are built for heavy-duty shop use such as lifting dies and castings, moving machine parts, positioning welders' work, leveling feed material for pump presses, conveyors and press brakes, and similar material handling jobs. Posts are telescoping to help stabilize and support loads during operation. Light-duty units feature a single-speed foot pump. Heavy-duty units feature a two-speed foot pump for maximum operator convenience. All foot pumps include a down speed control valve for safe platform lowering.

DC units include a 12V DC electric motor to raise and lower the platform. They also include a battery, on-board charger, and a hand control on an 8 ft. coil cord.

Units include four casters; two swivel with total-locking brakes and two rigid.

Model HT-02-1616A includes a platform that swivels 360° for use as a turntable. Model HT-02-1616A and HT-05-1818A come with a removable rubber platform cover.

## Hydraulic Elevating Carts

Portable ergonomic elevating carts minimize worker bending and lifting. Material can be easily loaded onto cart from table, lowered to safe transporting height, and raised to unload at destination. Foot pump includes a soft-lowering down valve. Move easily on four polyurethane casters, two swivel with brakes, and two rigid. All models feature an internal hydraulic velocity fuse in each cylinder. Steel or stainless steel construction.

## DC Powered and Manual Scissor Carts

Tables provide unparalleled ergonomic support in lifting, palletizing, loading, and unloading applications. Carts are raised or lowered with either a 12V DC powered motor or a manual two-speed foot pump. Units roll smoothly with (2) rigid and (2) swivel 4" x 2" phenolic casters with brakes. Push handle is removable.

Internal DC powered electric motor and 12V battery is included on DC units. Electric motor is rated at 1600 watts. Built-in battery charger is included (operated on 115V AC power). Push buttons to raise and lower lift are located on the power unit. Hand control on coil cord is also standard. Key-operated ON/OFF control for better security is built into the power unit. Platform is equipped with perimeter pinch-point guard for OSHA compliance.

## Lift & Tilt Carts with Sequence Select

*Model CART-1100-LT* has a unique design which allows the user to RAISE and TILT materials to an ergonomic position for better posture and operator comfort. The manual hydraulic foot pump controls the platform lift, lower, and tilt. A manual selector valve is used to control the lift/lower sequence independently from the tilt sequence. The service range in the tilt position is 34¼" to 54¼". The hinged platform includes a 7" high retaining lip. Cart is portable with two rigid and two swivel 5" casters.

*Model CART-400-LT and CART-600-LT* are elevated by means of a foot actuated hydraulic cylinder. As the table is raised, it simultaneously tilts to an angle of 45° at full elevation. Built-in retaining lip keeps containers in place.

## Traction Drive Electric Hydraulic Elevating Carts

The Traction Drive Electric Hydraulic Elevating Cart makes maneuvering heavy loads virtually effortless. A twist style throttle with reverse facilitates the maneuverability of this cart. The push of a button will raise and lower the platform. 24V DC battery operated with an on-board battery charger and maintenance free batteries. Standard features include: powered front drive wheels, twist style throttle with reverse, and fully programmable motor controller.

### Linear Actuated Elevating Cart

Transport materials from workstation to workstation with ease. Platform is raised and lowered with an electric linear actuator for precise positioning. Linear actuator will not allow platform to drift down - a common problem with hydraulic carts. This linear actuated cart is powered with a 12 volt DC battery and features an on-board charger. Hand held pendant control connects to power unit with a 6 foot coil cord. Emergency stop button standard on hand control. Includes two rigid and two swivel casters.

## Full Featured Pallet Trucks

• Heavy-duty 5,500 lbs. Capacity • Powder Coat Finish • User friendly entry and exit rollers  
 An economical way for one person to move heavy pallet loads without the use of a fork truck! Includes two articulating steering wheels and two front load rollers. Ergonomic design requires only 75 pounds of pulling force when fully loaded. Steering wheels include bearing dust covers for added life. Nose wheels are located on the front edge of each fork to assist in clean pallet entrance and exit. Reinforced triple-formed steel forks provide twice the strength of standard single-formed forks. Forks are 6¾" wide each. Equipped with internally mounted solid steel adjustable push rods. Spring loaded handle automatically returns to vertical position when not in use. Hydraulic pump design facilitates easy-access seal replacement. Chrome-plated hydraulic pump piston for long seal life. Also available in various sizes, capacities, and configurations as noted.

## Pallet Trucks with Digital Scale

The Pallet Truck with Digital Scale allows you to weigh your load on the spot for maximum efficiency. The frame uses heavy-duty steel construction for maximum strength and durability. This model is very user friendly and is suitable for low height lifting. The built-in scale allows you to weigh your load as you are handling it. The scale is selectable in a variety of increments to adjust to the size of your load. It has keyboard calibration and functional setup with automatic zero capabilities. Digital filtering is used to help compensate for vibration and motion to make the Pallet Truck with Digital Scale smooth and accurate. Forks are 7" wide each. Factory calibrated for shipping destination. Scale is powered with (6) D size batteries, AC adapter can be hooked up (not included).

## Ergonomic Power Assist Pallet Truck

Anyone who has operated a fully loaded pallet truck knows the most strenuous part is starting the wheels rolling. This Pallet Truck solves this back breaking problem. Pumping the handle of the pallet truck serves two purposes. First, it serves the traditional purpose of lifting the forks. Second, switch to the power drive accumulator and by pulling the handle back, the pallet truck begins to roll automatically, thus reducing the pulling force.

MODEL NUMBER	CAPACITY (POUNDS)	OVERALL FORK DIMENSIONS	FORK SERVICE RANGE	NET WT. (POUNDS)	LIST PRICE EACH
PM5-2748-PA-Y	5,000	27"W x 48"L	3" to 7½"	190	<b>TBD</b>

## All Terrain Pallet Truck

- Inside Straddle is 50" / Outside Straddle is 64"
- Pneumatic Tires have Sealed Bearings for Outside Durability

This lightweight yet strong tubular frame design handles evenly distributed loads up to 2,000 lbs. (2,000 lbs. at 12" horizontal load center and 1,500 lbs. at 15" horizontal load center). Large wheels allow for movement over most surfaces. Use at construction sites, gravel pits, and nurseries. Features large 16" front pneumatic tires and 10" pneumatic steering wheels. Individual forks are 4"W x 2"H. Easy to operate with three position handle, UP, DOWN, and NEUTRAL. Optional Tow Bar package allows the All Terrain Pallet Truck to be towed by an ATV or small utility tractor. Designed for pulling in either loaded or unloaded position.

## Gas Powered All Terrain Pallet Trucks

All terrain pallet truck with gas-powered traction drive system. Great for moving heavy loads over rough terrain. Powered by a Briggs & Stratton 6HP gas-powered engine for both the power traction drive and fork lift/lower. Handle with forward reverse speed control and dead man safety switch. Hydrostatic transmission with hand-operated forward and reverse selection. Powered fork raise and lower controlled with independent levers. Usable width between outriggers is 50". Pneumatic steer wheels are 13" diameter x 4" wide each. The drive wheels are 18" diameter x 8½" wide each (foam filled pneumatic wheels on ALL-T-4-GPT standard). Wheels include sealed bearings for outdoor use. Steering arc is 150°.

## Big Wheel Pallet Truck

- Steering Wheels are 8" x 2" Poly-on-Steel
- Load Rollers are 4" x 3½"
- Does Not Work with Standard Pallets

Use less pushing or pulling force when transporting large heavy loads across floors with the Big Wheel Pallet Truck. An alternative to fork trucks, this unit makes it easier to move loaded tubs weighing up to 4,500 pounds. The raised height of 16-1/8" and the lowered height 6-1/2" enables the pallet truck to service high bottom tubs. The Big Wheel Pallet Truck retains all of the quality workmanship of our other Pallet Master Pallet Trucks.

BW-PJ	BIG WHEEL	4,500	26-3/4" x 51-1/2"	5-1/2" to 15-1/2"	299	\$590.00

DC-25/FC-70/92.5/175♦

## Side Winder Pallet Truck

- Move Long Loads Down Narrow Aisles
- Moves FORWARD, BACKWARD, LEFT, and RIGHT
- Capacity is 3,000 pounds

Transport long loads down narrow aisles with this heavy-duty Sidewinder Pallet Truck. This versatile Pallet Truck retains all the quality workmanship of a standard pallet truck in addition to providing lateral movement. Simply place the forks into the pallet then elevate to approximately seven inches, rotate handle, and lock detent into place. The second set of rollers, right/left, are actuated. Now push the Side Winder perpendicular to the traditional direction.

## Fully Powered Electric Pallet Trucks

Fully powered pallet truck for easy and quick operation. Includes fingertip raise and lower buttons. Easy-to-operate throttle for forward and reverse direction. Throttle offers infinite forward and reverse speeds. Safety features include a horn and belly reverse button. Units run off 24V batteries with battery charger standard. The 3,000 pound capacity models use two 12V batteries with 70Ah rating. The 4,500 pound capacity models use four 12V batteries with 180Ah rating. Units will typically achieve a minimum of eight (8) hours of service on one full charge. The Non-Adjustable Pallet Jockey, model PJ-1005, will convert the EPT-2748-45 (only) into a Walkie Truck, see page 67.

## Wheel Nose Pallet Trucks

- Take the Guess Work Out of Close Pallet Placement
- Optimize Floor and Truck Space with this Innovative Pallet Truck

The Wheel Nose Pallet Truck is designed to position pallets or skids closely together. The fork end is set back from the front rollers allowing for one pallet pick up at a time. The unit has a rubber grip handle with a three position lever for easy operation and maneuvering. This heavy-duty unit is rated at 5,000 pounds capacity and has a service range from 3½" to 8". Unit includes two articulating steering wheels and two front load rollers. Spring loaded loop handle automatically returns to vertical position when not in use. 38" forks are used for maneuvering in tight spaces.

## Pallet Jockey for "Walkie" Trucks

- Eliminate the Use of Fork Trucks for Unloading
- Maximize Your Trailer Loads and Profits
- Reduce Work Related Injuries

The Pallet Jockey is a simple device that allows drivers and warehouse personnel to efficiently unload sideways pallets with their "Walkie" powered pallet trucks without wasting valuable time and resources.

The Non-Adjustable unit is ideal for warehouse distribution centers that have one particular electric pallet truck model. To use simply place the Pallet Jockey hooks into the fork wheel openings. Fits both Raymond and Crown brand walkie trucks and our electric pallet truck, model EPT-2748-45.

The Adjustable unit is designed to fit various types of electric pallet jacks. To use simply loosen wing bolts and slide adjustable brackets to proper slot, then tighten wing bolts.

## Four Wheel Multi-Position Steel Hand Truck

This hand truck is great for uneven surfaces and outdoor work. Small 4" x 1¼" mold-on-rubber swivel casters are located at the back of the cart to stabilize loads and prevent tipping. The back casters will also transform the unit into a horizontal platform truck. The unit will lie back horizontally, the handle will release to a standard position, and now the cart is a platform truck. 10" x 3½" pneumatic casters. Ships knockdown.

## Aluminum Ergonomic Hand Truck

Heavy-duty construction, yet lightweight aluminum design, provides superior control. This unit has knuckle guard handles, fold up nose plate, and curved back plate for transporting cylindrical objects. Transporting down stairs or steep hills is no problem with this unit. 10" x 3½" pneumatic wheels are standard. Ships knockdown.

## High Back Aluminum Hand Truck with Push Out

The High Back Aluminum Hand Truck with Push Out will transport tall heavy loads weighing up to 300 pounds from workstation to workstation. When the load has reached its final destination, the user simply pushes down on the back plate with their foot and the plate on the front of the unit will slide the load off. This feature reduces stress on the user's back. 8" x 1¾" semi-pneumatic wheels. Ships knockdown.

## Steel Stair Hand Truck

Unique design features tandem triple-wheel assemblies that work great when going up and down stairs. Wheel assembly smoothly rotates as you go up or down each step - eliminates the thud and bump associated with conventional two wheel hand trucks on stairs. Caution - do not use more weight than you can safely handle. Rear wheel assembly also allows hand truck to roll easily on 4 wheels while on flat surfaces. Single loop handle. Steel construction. Painted finish.

## Adjustable Work-Mate Stands

Minimizes fatigue by elevating workers to heights that are comfortable and ergonomically correct. Especially useful when multiple shift employees operate the same piece of machinery. Serrated style platforms ensure safe footing in most wet environments. Ergonomic matting deck style provides comfort for the operator who stands all day. The height of each leg can be adjusted individually to ensure proper working height. All sizes have four legs except the 60", 72" and 96" long models which have six legs. Powder coated safety yellow finish. Welded steel construction.

## Linearizer Electric Worker Platforms

Designed to raise or lower a worker to optimum working height for maximum productivity with minimum risk of back injury and fatigue. Typical applications include packaging stations, heavy machinery such as drill presses, lathes and saws, individual work cells, or work areas where height is a problem. Lifting source is a low maintenance electric linear actuator. An ergonomic anti-fatigue mat is included on the platform. Two rigid casters on the back side are used to facilitate ease of movement.

Unit is operated with a pendant hand held push button control on an 8' cord. Available with either 115V AC or a DC power pack. Shop air power option is also available.

## Posi-Crank Worker Platforms

The Posi-Crank ergonomic work station is an economical variable height work positioner. With a simple turn of a crank, the platform height may be adjusted to the optimum ergonomic level suitable for each operator. Benefits of the Posi-Crank include minimizing the risk of cumulative trauma injuries, back injuries and fatigue, while maximizing efficiency and operator morale.

The Posi-Crank incorporates the use of ACME threaded rods and a series of gears for simple yet effective height adjustment. The crank handle may be removed for maximizing the operating space. The deck is constructed of steel treadplate for strength and better traction.

## Add-A-Levels

Raise workers to an optimum ergonomic height. Constructed from a heavy-density polyethylene resin which is 100% recycled. The flow-through grid design permits liquids and small scrap to drain away. Also good for use as storage shelf to keep products off wet floors. The stack kit allows two units to be stacked and locked together. The connector kit allows you to connect units side by side. Contact factory for optional ergo-matting.

## Ergonomic Worker Seats

From a low crouch to a standing position, the seat height of the CPRO-200 and CPRO-600 can be adjusted in 2" increments by removing the seat and hooking it to the horizontal bars located on the chair frame. These units have four rubber "shocks" under the seat base that allow the seat to tilt forward, left, and right so it can accommodate your body movements. The front tilted position of the seat helps the user maintain the natural posture position of the spine.

The portable work chair, model CPRO-800LP, is not only convenient but easy to use. Simply unfold the rear legs and slide the contoured padded seat to the desired ergonomic height. The infinite adjustment guarantees the optimum work posture. Folds up to a 4" profile for easy portability and storage.

## Fork Truck Seats and Accessories

Ergonomic and comfortable seat design helps provide optimum body support for individual operators. Replace worn or broken fork truck seats with our easy to install universal mounting design. Standard features include: ergonomic seat design, waterfall front on LTSD series, vinyl or cloth material, low profile design, safety seat switch, storage pockets, seat back angle adjustment 8°, adjustable lumbar support, and retractable safety belt.

**Ergo-Turn System** - Smooth pivoting motion enables driver to turn seat 30° left or right of center position. Swivel system can be incorporated with air suspension system for total driver ergonomics.

**Air Suspension System** - Minimizes harmful vibration to fork truck driver. Reduces fatigue and back pain.

**Seat Safety Switch** - Prevents fork truck from operating when an operator is not sitting on the seat.

**Chrome Hip Restraints** - Used in place of arm rests to stabilize and secure the operator in the fork truck seat.

**Flip Up Arm Rest** - Flip up arm rests are moveable to allow easy access on and off fork truck.

BACK-MAX

BACK-COMBO

## Back Support Cushions

There is more stress placed on the lower back than on any other part of the body. Provides support for the lower back to relieve and prevent back pain and fatigue. The S-shaped frame comfortably conforms to the natural S-curve of the spine to guide the back into correct alignment and promote proper sitting posture. Lightweight and portable. Designed for use in any seat; in the office, vehicle, fork truck, or at home. Attaches with hook and loop type fasteners. All Back Support Cushions are black in color.

## Fork Truck Jacks

### Manual Hydraulic Fork Truck Jack

Designed to raise your fork truck for maintenance. Features high-quality seals, chrome plated internal components, and rugged steel construction. Maximum lift of 16" provides room needed to perform a variety of repairs. Manually raised by hand pump lever. Removable handle and compact size makes it easy to maneuver and transport. Includes two jack stands with holding pins for adjustable heights.

### Air Powered Fork Truck Jack

Air-assist motor quickly raises saddle to lift point and then lifts load to desired height. Air powered for quick and easy operation. Uses standard coupler hook-up to a shop air compressor with air regulator control lever handle. Pressure relief valve is located on top of handle for metered control and load height adjustment.

## Linear Actuated Adjustable-Height Work Bench

Increase productivity by allowing the body to reposition to a more comfortable position. The Linear Actuated Adjustable-Height Table allows anyone, regardless of their height, to easily use the table as a workstation or desk. Cantilever design optimizes foot, knee, and leg room. The 36" wide x 36" deep platform is large enough for small parts assembly and will hold up to 500 pounds evenly distributed. A hand-held raise and lower control is attached to the understructure of the table; no more misplacing the remote. Durable hardwood platform standard.

## Synchronized Lift Systems

This unique system may be attached to your equipment to allow for quick and easy height adjustment. It provides for completely synchronized lifting of all four legs at the same time, regardless of weight distribution. Electric/hydraulic operation with single or three phase power available (specify when ordering). Includes four lifting legs with flexible hydraulic hose and quick connectors, slave-style manifold block, electric motor, and hand control. Each lifting leg includes a bolt-on mounting plate (hardware not included). The easy to install components are shipped ready to use. Steel construction.
