Would you like your music profiles to run more fluidly? Are you tired of the overlap between songs? Would you like to make a song slower or faster? Then check out Mixmeister Express 6 on Mixmeister.com.

This powerful program will help you create professional sounding profiles with minimum effort.

Highlights

- ? “Create professional-quality mixes, with beat-mixed transitions between songs that sound great.
- ? Make a song slower or faster to achieve the tempo you need, without changing pitch.
- ? Trim long songs down to size or remix short songs to make them last longer.
- ? Add one-click special effects for even more fun ways to blend songs together.
- ? Create a full-length mix CD (up to 80 minutes), and export your DJ mix to your iPod or other portable audio player.

Blend your beats. One of secrets to creating a great mix CD is getting the overlap between songs just right. MixMeister Express greatly simplifies this process by automatically calculating how to beat mix between songs. You can use the one-click transition settings as a starting point for your creation, or, if you're a more advanced user, you'll be able to add your own tweaks and touches.

Pick up the pace. With MixMeister Express, it's easy to make a song faster or slower to achieve the exact tempo you want. Whether you're creating a mix for a dance floor or a group fitness class, you can adjust the beats per minute to heat people up or cool them down.

Share your creation. If you're throwing a party, you can give MixMeister the job of spinning the tunes. You can even prepare some of the mix in advance, and change it on the fly. MixMeister Express also has integrated CD burning capabilities, so creating your own mix CD is a snap.”
