AUTOMOTIVE FILMS WITH NANOTECHNOLOGY

Sigma automotive window films harness the power of nanotechnology to offer incredible performance, good looks and easy installation, all at a competitive price.

Unique nano-particles deep within the film provide high heat rejection with low reflectivity, for enhanced performance without a mirror finish. Excellent UV protection adds to passenger comfort. And because it has no metallic layers, Sigma won't interfere with cell phone, GPS or radio reception.

Sigma comes in five attractive shades of graphite smoke from 50% to a high privacy 5% VLT. The durable color won't fade or corrode.

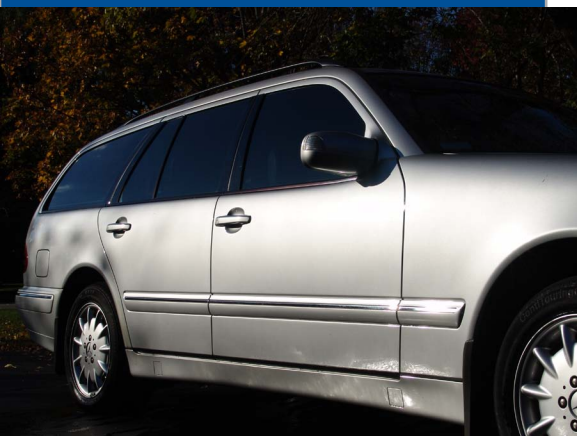

Performance, good looks, comfort - it's all here with Sigma, the next generation of automotive window films.

SIGMA: THE CUSTOMER'S CHOICE

- Non-metal construction means no interference with radio, cell phone or GPS
- Good looks
- Lifetime warranty
- High heat rejection
- Outstanding UV Protection
- Low visible light reflectance
- No fading or purpling
- Easy maintenance
- Competitive price

SIGMA: THE DEALER'S CHOICE

- Printed liner shows footage remaining on roll
- Fast dry
- Easy shrink
- Aggressive adhesion to rear-window dot matrix
- Durable color
