CW 5/15 Test 22 Review

HW 5/18 PS 99 #1,2,22,23,25,26, PS 125 #25

The Final Exam (Wednesday, June 3 at 10:30) will have 30 problems – two points each.

The problems will be like the problems below. If you have an A now and in the past 3 quarters, you are exempt from the exam. No one is exempt from the following problems.

These Exam Review problems are all odd-numbered. Be sure to check your answers in the back of your book. Please note that since I am giving you the answers, it is the WORK that you get credit for. Be sure to show your work for credit. All graphs must be graphed on graph paper except for the exponential growth/decay problems.
