“Hi Ron, this is Karis Vaillancourt. I really don’t feel well and I can’t make that meeting tonight—town meeting—on this solar project. I’m totally against it, because my understanding is that a byproduct is cadmium and it is extremely dangerous to the environment. There’s no way to dispose of this cadmium. I may have it wrong because I’m old. I’m going to be 75 next month and I really don’t feel well, and so I can’t come. But I’m really strongly against this. I don’t want anything that will endanger our farmland, our food, and any chemicals that are unable to be disposed of safely. So, God bless you, and thank you. My number is (585) [not transcribed]. God bless you. Thank you Ron. Bye.”
