

Ronald L Brand,  
Director of Development  
Town of Farmington  
RE:SEQR Delaware River Solar

10-17-18

Dear Mr. Brand,

Since 1962, I've owned the 100-acre farm on Yellow Mills Rd directly across from the proposed Solar Power Plant. We have faithfully maintained this property and have paid taxes on our working farm for the past 56 YEARS.

I never dreamt that anything like this could be considered for our agricultural part of Farmington. A Power Plant of this size will be in direct view from our farm and will decrease the value of our property ,which especially impacts me at this point of my life.

I object to New York State tax dollars being spent on such a Power Plant. I feel the Town of Farmington Planning Board and Farmington Town Board need to represent the citizens of Farmington and not the interest of a New York City Developer. I am counting on you to keep the neighborhood rural & agricultural.

Thank You for your consideration.

Caroline Heberle
