

# 07

Dear Mr.Brand, Town of Farmington

10/18/18

Director of Development,

RE: SEQR Letter /Delaware River Solar Power Plant

I'm writing you in opposition to the Large-Scale Solar Power Plant proposed By Delaware River Solar. Delaware River Solar is a startup company in NYC and does Not have the best interest of the citizens of Farmington in mind as they DUMP their footprint in our back yard.

Three years ago I purchased a Historically significant Cobblestone House at 595 Yellow Mills Rd and have taken great pride in restoring this Ontario County beauty. I emphatically would NOT have purchased /restored this labor of love had I been aware of the possibility of such a large-Scale Solar Power Plant being built nearby.

I moved to Farmington for the rural farm atmosphere and the thought of living next to an Industrial complex sickens me.

Thank You

James Dennie , Farmington Resident.
