**Subject:** 7-Megawatt Solar Farm

Dear Mr. Ingalsbe,

I would like to inform the nay sayers for the above mentioned project that they may seek out alternative energy sources available today. Visit us in Steuben County if you find yourself uncomfortable with solar panels in your back yard, which lie close to the ground and motionless. Here in Canisteo, NY we are looking at a project for 2019-20 which will install 120 windmills measuring from 400 to 600 feet in height. North of us in Cohocton and Howard there are presently a dozen or so 400' towers each, and a few shorter windmills constructed in Jasper. My message being, it could be worse. Would love to see solar our back yard rather than wind.

Regards,

Terry Sanford  
Canisteo, NY
