Members of the Farmington Town Planning Board
1000 County Road 8
Farmington, NY 14425

This letter is written to express opposition to the **SEQR Delaware River Large Scale Power Plant**, which is proposed for farmland near the intersection of Fox Road and Yellow Mills Road. Here are just a few reasons why:

- This area of Farmington has historically been rural, agricultural, and open, as reflected in the *Town of Farmington Comprehensive Master Plan*.
- The project would result in an undesirable change in the overall character and aesthetics of the area.
- The project would **adversely affect the physical and environmental conditions** in the surrounding area.
- The project would result in **decreased property values** for current and potential future residents.
- The project is of **no benefit** to our town. All the energy produced would serve other downstate communities.

Please keep in mind that you, as town officials, represent **all** the citizens of Farmington. We trust that you will make prudent decisions for the greater good that benefit the community as a whole, and not just one individual who stands to gain financially.

Sincerely,

Karen Stratton
