Lance,

Attached please find additional information regarding the deer fence which was discussed this morning at the PRC. Please note that the Perimeter Fencing detail was submitted in the original application in July 2018 and can be found on sheet D-1 of the plans.

Also included are 2 colored photos of installed deer fencing, a spec sheet from a manufacturer and the portion of the NEC codebook referencing "Enclosure for Electrical Installations".

If there is anything else that needs to be resolved, please let me know.

Thank you,

--
