Farmington Town Zoning Board

Ronald L. Brand Director of Development;

RE: Delaware River Large Scale Solar PV Power Plant

I am writing to keep District 1, the proposed acres of land on Fox and Yellow Mills Road Open, Rural and Agricultural. I have been a resident of Farmington for 41 years. I currently live at 126 Yellow Mills Rd. I spent my childhood growing up on Fox Road where my parents still live. I am advocating to preserve our rural area. It should remain just the way it is Beautiful, Natural, and Environmentally Intact.

Several years ago, I spearheaded a proposal for town water in our district. The result was "WE" as a community were able to reap the benefits of safe, clean purified water. I am not aware of any benefits that this large scale solar power plant will provide our town or community.

I'm from the country and I want it to remain that way! Country!

Sincerely,

Tammy C Johnson
