

10/24/18

Deputy Director, Town of Farmington

Director of Development

RE: SEQAR Letter / Delaware River Solar Power Plant

I'm writing to you in regards to the very large Power Plant that is proposed by Delaware River Solar.

I'm opposed to Delaware River Solar building the solar plant. They don't have any interest in the community. The town of Farmington does not benefit in any way.

The POWER Plant will take away from the natural aesthetics of this beautiful countryside and our surrounding area.

I moved back to this area three years ago because of the natural beauty of the Landscape.

I will have to drive

by this massive eyesore
multiple times a day.

It really saddens me that
this could even be considered.

Thank you,

Christina main, Farmington Resident
