Data Collection Tool

MN PQC

MN Perinatal Quality Collaborative

Topic: Maternity service team review and document sequence of events, successes with and barriers to swift and coordinated response to preeclampsia with severe features. **Goal:** Reduce time to treatment (< 60 minutes) for new onset severe hypertension (HTN) (≥ 160 systolic OR ≥ 110 diastolic) with preeclampsia or eclampsia or chronic/gestational HTN with superimposed preeclampsia (include patients from triage, L&D, Antepartum, PP, ED) in order to reduce preeclampsia morbidity in Minnesota. **Instructions:** Complete within 24 hours after all cases of new onset severe HTN (≥ 160 systolic or ≥ 110 diastolic) event in pregnancy up to 6 weeks postpartum. Debrief should include primary RN and primary MD to identify opportunities for improvement in identification and time to treatment of HTN.

Event Date: _____

Maternal Race: White Black Asian American Indian/Alaskan Native Native Hawaiian/Pacific Islander Other/Multiple

Ethnicity: Non-Hispanic Hispanic Language: English Non-English

Pregnancy Status: Pregnant Gestational Age: _____ Postpartum Days PP: _____

Diagnosis: Chronic HTN Gestational HTN Preeclampsia Superimposed Preeclampsia Eclampsia

Was sustained severe BP (2 BP of $\geq 160/100$ 15min apart) treated? Yes No

If treated, time from second elevated BP to treatment (in min): _____ Was treatment algorithm used? Yes No

Discharge Education: Yes No

Discharge Management: Follow-up appointment scheduled within 3-10 days (for all women with any severe range HTN/preeclampsia) Yes No

Was patient discharged on meds? Yes No **If YES:** Was follow-up appointment scheduled in <72 hours? Yes No

Opportunities for improvement to reduce time to treatment (identification of severe HTN to treatment goal <60 minutes):

Debrief Participants: Primary MD: Yes No Primary RN: Yes No

TEAM ISSUES	Went well	Needs improvement	Notes
Communication			
Recognition of severe HTN			
Assessing situation			
Decision making			
Teamwork			
Leadership			

SYSTEM ISSUES	Went well	Needs improvement	Notes
HTN medication timeliness			
Transportation (intra-, inter-hospital transport)			
Support (in-unit, other areas)			
Med availability			
Other issues

The Brave Place

Together we will create brave space Because
there is no such thing as a “safe space” —

We exist in the real world

We all carry scars and we have all caused
wounds.

In this space We seek to turn down the
volume of the outside world,

We amplify voices that fight to be heard
elsewhere,

We call each other to more truth and love

We have the right to start somewhere and
continue to grow.

We have the responsibility to examine what
we think we know.

We will not be perfect. This space will not be
perfect. It will not always be what we wish it
to be

But It will be our brave space together, and
We will work on it side by side.
