

Prodovite™

Supporting optimal
Health, Energy and Vitality
when you need it.

How do you take your best average in personal performance and increase it to ABOVE AVERAGE? The Answer is better nutrition to the body when and how your body needs it. Prodovite™ is the perfect companion for fitness enhancement. Functioning as a multi-purpose supplement, it can be used before rigorous activities to boost the body's energy production, or after – to aid the body in a quicker and more thorough recovery. Prodovite™ is designed to be absorbed into the bloodstream quickly and is clinically researched and shown to cause a positive effect within five minutes.

Prodovite's™ improved delivery system gives your body the ability to create energy more efficiently while performing, rather than having to wait for the digestion of other products. With the hundreds of nutrients in Prodovite™ being delivered using our unique Prodosome™ technology, your body can use more energy to both fuel and rejuvenate muscle tissue when it needs it.

One of the advantages of Prodovite™ synergistically allowing nutrients to enter the bloodstream together, also makes it an excellent foundational supplement. Synergistic nutrient absorption maximizes the benefits received from other exercise enhancement formulas.

Prodovite™ comes in a 30 oz bottle or 1 oz shots for your convenience. Not only does it give your body rapid and effortless access to the nutrients it needs for peak performance, but, it does so in a safe and holistic manner. Athletes using Prodovite™ can feel comfortable with the fact that it has been tested against WADA standards and is shown to contain no detectable amount of over 140 of the most typically banned performance enhancing drugs. Give your body a safe, natural edge with Prodovite – "Nutrition you can feel"
