DRINKING WATER PROBLEM CORRECTED

Customers of Greenfield Municipal Utilities were notified on 7/17/2018 of a problem with our drinking water and were advised of a bottled water advisory followed by a boil advisory on 7/18/2018. We are pleased to report that the problem has been corrected and that it is no longer necessary to boil water for human consumption. We apologize for any inconvenience and thank you for your patience.

Greenfield Municipal Utilities has flushed out their storage and distribution system. Results of the samples sent to the lab for analysis on Thursday, July 19, 2018 confirm that we are within the recordable DNR limits.

This document officially lifts the boil order that began on Wednesday, June 18, 2018.

As always, you may contact GMU at 641-743-2741 with any comments or questions.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Greenfield Municipal Utilities.
