## **Marital History**

It is often good and necessary for us to get a history of your marriage. While there are many different ways of doing this, having you write one out gives us a chance to see your marriage through your eyes as you see it. On the space provided we would like you to write a brief history of your marriage including how you met, the dating time, the early years, the present, and how you see the future. Don't worry about spelling or grammar just do your best to tell the story of your marriage in your words. This allows us to see it as							
you do.
