

## It's your data. Do your employees know how to protect it?

### Do your employees know:

- How to Identify phishing emails and websites
- Not to send PII (SSN, credit card, driver's license, etc.) in emails
- How to protect portable media
- The importance of creating strong passwords
- Not to share their passwords
- The dangers of posting PII on social media
- About the risks of using their personal devices with company data

Common sense, right? You'll be surprised how many employees don't know or practice these simple procedures.

**Our Training Program can help you get your employees trained and educated on how to protect your data.**
