

Leadership Training, Evangelism & Medical Outreaches to Tanzania

March 1-11, 2015 (trip code MP1501)

August 9-19, 2015 (trip code MP1502)

You have an incredible opportunity to see Tanzania's Mara region transformed into a place of hope with self-sustaining communities that have embraced the gospel. Join us in 2015 as we continue to bring hope to Tanzania!

What will we do?

Our focus for these trips will be on bringing medical help, evangelism and leadership training to vastly underserved villages in northern Tanzania.

What skills do I need?

You need to have a willingness to be used by God in another culture. You need to be flexible and able to adapt to the needs and opportunities that are presented to you. Non-medical team members will have opportunities to share Christ with residents and lead discipleship groups. Medical team members will have the opportunity to interact with villagers while assisting with their health care needs. Pastors/Ministry leaders will have the opportunity to train Tanzania church leaders.

What about the money?

The trip is \$3800*. We will teach you how to raise support through letters and personal contacts, or you are welcome to cover the cost yourself if able. The amount includes just about everything needed for the trip--food, lodging, airfare, ground travel, and travel insurance. Not included are personal items, souvenirs, snacks, Amsterdam sightseeing, etc. You also will need to bring items for lunch for the days that we are in the villages. The tuition does not include the cost to obtain a passport or any needed shots (Yellow Fever is required). Please note that your deposit is non-refundable, as well as any funds needed to cover expenses occurred on your behalf should you choose not to go. Also, funds donated on your behalf are non-refundable.

*based on airfare from DFW & subject to change

What else is needed?

Medical professionals will need to provide copies of their licenses or certifications which we will submit to the Tanzanian government. Participants are expected to be team players, refrain from the use of alcohol or tobacco (including electronic or vapor cigarettes) during the entire trip, dress in a way that is respectful of the culture (dresses or skirts for ladies when visiting villages), and submit to the trip's leadership. In addition, participants are expected to complete the training provided for the trip. Training is provided through our website as well as through one or more "live" sessions (virtual or in-person depending on where team members live).

Tentative Itinerary

Sunday (late afternoon)--Depart U.S. for Amsterdam
Monday--Day in Amsterdam; Overnight flight to Nairobi, Kenya
Tuesday--Fly to Mwanza, Tanzania; travel to Mara Region
Wednesday--Leadership conference; Medical clinic
