

Chapter 6 Appendix A

Observational Learning Self-Checklist

Name: _____ Date: _____

Name of person observing: _____

Skill/task Observing:

Instructions: Once you have decided to observe an expert's performance, use this checklist to prepare for and carry out the observation, and then to reflect and debrief following the observation.

Before the Observation

Describe the purpose of the observation

Describe the desired outcome if the performance is successful

Describe anything to which you and your supervisor want to pay special attention

Planning Notes

During the Observation

Describe what you see

Describe what you don't see

Describe any questions that arise as you observe the performance

Observation Notes

Observational Learning Self-Checklist

After the Observation

Describe if you think the performance was successful (i.e., the desired outcome was achieved) and why or why not

Consider why you think the individual engaged in a given response versus a different response

Identify and describe any specific decision points during the performance

Describe the degree of cultural responsiveness and any modifications you think were made

After reflecting, outline any questions you have for the performer

Describe how the performance you saw differed from other approaches

Plan whether you will incorporate anything from the observation into your repertoire and how you will do it and evaluate yourself

Post Observation Notes and Planning:
