Contents

About the Authors v
Preface xxvii

1. Achieving Lasting Behavior Change By Applying Behavior Analysis 1
Introduction 2
The Radical Behavioral Approach 5
The Origin and Evolution of the Field of Applied Behavior Analysis 6
The Essential Features of Applied Behavior Analysis: A Scientific, Technological and Professional Approach 8
ABA as a Scientific Approach 8
Applied Behavior Analysis as a Technology of Behavior Change 10
Applied Behavior Analysis as a Profession 12
Professionalism of Applied Behavior Analysis 12
Contemporary Behavior Analytic Practice 13
What Path Does Applied Behavior Analysis Generally Follow? 13
Identifying Behavior for Change 14
Designing and Implementing an ABA Program 14
Preparing an Environment Supportive of Constructive Change 14
Specifying and Refining Goals and Objectives 17
Identifying Current Reinforcers 17
Collecting Useful Data 17
Promoting Positive Change 18
Implementing, Monitoring, and Experimentally Analyzing the Function of the Intervention Plan 18
Getting There: Continue Monitoring Behavior and Fidelity of Intervention 18
Staying There 18
Summary and Conclusions 19

2. Designing Effective Strategies of Change: Essential Building Blocks 20
What is Behavior? 21
What is Learning? 21
What is Teaching? 22
How Does Behavior Analysis Work? 22
Behavioral Principles and Procedures 23
What Does the Term *Environment* Mean? 24
Differentiating "Environment" from "Stimulus" 24

Respondent Behavior and Respondent Conditioning 26
Operant Behavior and Operant Learning (Conditioning) 27
The "C" in Operant Learning (Conditioning) 28
Positive and Negative Reinforcement Defined and Illustrated 28
Extinction, Positive Punishment, and Negative Punishment Defined and Illustrated 29
The Role of Antecedents ("A"s) in Operant Learning 30
Antecedent Stimuli Defined and Illustrated 30
Motivating Operations as Antecedent Events 31
Summary and Conclusions 31

3. Preparing a Supportive Environment for Behavior Change 33
Familiarize Yourself with the Client(s) and Setting 34
Analyze the Current Operating System or Culture 35
Involve Key People 36
Determine Available Resources 36
Assess Current Skill Levels and Health Status 36
Select Behavioral Objectives and Interventions Collaboratively 37
Analyze the Function of Current Contingencies 37
Select and/or Design Change Methods 38
Select or Devise Behavioral Measures 38
Analyze the Function of the Treatment 38
Prepare for Constructive Behavioral Support and Change 39
Organize and Manage Team Operation 39
Client Behavior Change: Program Development and Selection 41
Plan for Generalization from the Start 41
Ensure Procedural or Treatment Integrity 42
Measuring Procedural Integrity 43
Assure Contextual Fit When Selecting Goals and Interventions 44
Select Interventions Collaboratively 46
Involving Clients and Stakeholders 47
Use Acceptable and Comprehensible Language to Clarify Contingency Managers' Tasks 48
If Necessary, Temporarily Incorporate, then Fade Intervention Prompts within the Natural Environment 49
Support for the Contingency Manager(s): Performance Feedback 51
Summary and Conclusions 53

4, Sharpening the Focus by Refining Goals and Objectives 56
Getting Started 58
Your Organization's Mission 58
Organizational Culture 59
What Is Strategic Planning? 60
What is Behavioral Assessment? 60
Setting Goals 62
Goals Defined and Illustrated 62
Factors Influencing Goal Selection 62
Deciding Whether to Proceed 63
Defining Problems and Tentative Goals Behaviorally 68
Refining Your Selection of Goals 70
General Considerations in Goal Selection 71
Achievable Yet Challenging 71
Constructive and Functional Goals 72

Direct Rather than Indirect Approach 73
Foundational Skills 74
Immediate and Long-Term Benefits 74
Age and Developmental Level 75
Preventing and Resolving Goal Conflicts 76
Participative Goal Setting 76
Arranging for Advocacy 76
Terminating Services 77
Supporting Voluntariness over Coercion 77
Behavioral Objectives 78
Defined 78
Sample Behavioral Objectives 80
Summary and Conclusions 81

5. Reinforcement: Fueling Behavior Change 83
Defining the Term *Reinforcement* 84
Natural vs. Planned Reinforcement 84
The Reinforcement Procedure Defined and Illustrated 86
Reinforcers Defined, Illustrated, and Differentiated from Reward 87
Differences between Reinforcers and Reinforcement Procedures 88
Positive Reinforcers and Positive Reinforcement Procedures Defined, Illustrated, and Differentiated 88
Negative Reinforcers and Aversive Stimuli Defined and Illustrated 90
Negative Reinforcement Procedures Defined and Illustrated 91
Escape and Avoidance Defined and Differentiated 91
Using Escape as a Negative Reinforcer 93
Differentiating Positive from Negative Reinforcers 94
Are Positive and Negative Reinforcement Really Different? 95
Is Applying Negative Reinforcement Advisable? 96
Common Concerns or Disadvantages with Using Reinforcement 97
Use of Contrived Reinforcers 97
Unwanted Side-Effects of Reinforcement 98
Bribery 98
Treating People Differently 99
Loss of Intrinsic Motivation (The "Overjustification Effect") 99
Summary and Conclusions 100

6. Increasing Behavior by Developing and Selecting Powerful Reinforcers 102
Goals 102
How Does a Stimulus Develop into a Reinforcer? 103
Primary or Unconditioned Reinforcers and Aversive Stimuli 103
Secondary or Learned (Conditioned) Reinforcers 104
Secondary (Conditioned) Aversive Stimuli 105
Developing Secondary Reinforcers 105
Generalized Reinforcers and How They Develop 106
Classes of Reinforcers and Automatic Reinforcers 107
Selecting Reinforcers for Individual Application 107
Selecting Reinforcers: Indirect Assessments 108
Selecting Reinforcers: Direct Assessments 109
Concurrent-Choice Arrangements (CCAs) 115

Consider Motivating (Establishing) Operations and Response Deprivation in Reinforcer Selection 116
Consider Individual Differences and Receptivity to Reinforcing Events: "Different Strokes for Different Folks" 117
Select and Use a Variety of Reinforcers 118
Novelty in Reinforcer Selection 118
The Value of Reinforcer Sampling 120
The Role of the Reinforcer Mediator 120
Summary and Conclusions 121

7. Organizing for Behavior Change by Collecting Useful Data 123
Behavioral Assessment 124
Behavioral Assessment Defined and Illustrated 127
Four Characteristics of a Good Measurement System 127
Selecting Measures that Contribute to Treatment Outcome 128
Designing or Selecting a Behavioral Measurement Method 128
Selecting Valid Measures 129
Reactivity and Adaptation 129
Selecting Reliable Measurement Systems 130
Calculating Interobserver Agreement 131
Measuring Treatment Integrity 131
Factors Influencing Reliability and Validity of Assessment 132
Instructional Demand 132
Measurement Complexity 133
Observer Awareness of Being Assessed 133
Observational Bias 133
The Measurement Process 133
Measuring Behavioral Products 133
Measuring Transitory Behaviors 134
Recording and Reporting Transitory Behavior 135
Event (Rate) Recording 135
Duration Recording 136
Latency 137
Interresponse Time (IRT) 138
Interval Time-Sampling Systems 138
Selecting a Time-Sampling Method 140
Selecting Appropriate Measurements Based Upon Dimensions of Behavior 143
Episodic Severity or Intensity 143
Observing Behavior in Groups 145
Methods for Calculating Interobserver Agreement 146
IOA for Permanent Product Measuring 146
IOA for Event Measures 146
Indices of Agreement (IOAs) for Duration and Interresponse Time (IRT) Measures 147
Reporting Reliability Data 148
Summary and Conclusions 148

8. Optimizing Client Progress by Monitoring Behavior Change: Recording, Graphing, and Analyzing Patterns of Change 151
Implementing Observational Systems 153
Behavior-Recording Staff 153
Automated Recording Systems 155
Scheduling Behavioral Recording 156

Frequency of Recording 156
Duration of Recording Phases 156
Definitional Detail 157
Unit of Analysis 157
Graphing Behavioral Data 159
Graphing Guidelines 159
Standard Format for a Graph 160
Steps in Graph Construction 161
Graphic Variations 161
Bar Graphs 162
Cumulative Records 162
Standard Celeration Charts 166
Monitoring Changes in Behavior Patterns 170
Interpreting Behavioral Data 172
Reporting Demographic Variables 174
Summary and Conclusions 175

9. Optimizing Client Progress by Analyzing the Functions of Our Interventions: Basic Experimental Designs 176
Common Myths 177
Advantages of Single-Subject Experimental Designs 179
Demonstrating Functional Relations 180
General Requirements for Single-Subject Designs 183
Withdrawal (Return to Baseline) Designs 183
Selecting and Using the Withdrawal (Return-to-Baseline) Design 183
Actual Illustrations 186
The (True) Reversal Design 188
Additional Return–to-Baseline Design Variations 188
Advantages of the Withdrawal or Return-to-Baseline Design (A-B-A-B) 190
Disadvantages of the Withdrawal or Return-to-Baseline Design 190
Multiple-Baseline Design 191
Using Multiple-Baseline Designs 191
Variations of the Multiple-Baseline Design 193
Planning and Implementing Multiple-Baseline Designs 197
Advantages and Disadvantages of Multiple-Baseline Designs 198
Summary and Conclusions 201

10. Setting a Foundation for Positive Change: Identifying Participant's Functional Reinforcers 202
The Term "Functional" 204
Functional Behavioral Assessment 205
Various Functions of Behavior 206
Approaches to Conducting FBAs 208
Biological and Physiological Influences 208
Indirect (Anecdotal) Assessments 209
Descriptive Assessments 212
Analyzing Descriptive Assessments 216
Functional Analysis 221
Methodological Variations 225
Telehealth Service Delivery Model and Functional Behavior Assessment 225

From FBA to Treatment Development 227
Selection of Replacement Behavior 227
Selecting an Intervention 227
Legal and Ethical Implications of Conducting Functional Behavioral Assessments in Schools 229
Summary and Conclusions 231

11. Rapidly Attaining Positive Change: Implementing Reinforcement Effectively 234
Informed Consent and Assent 235
Enhancing Reinforcer Effectiveness 236
Selecting Effective Reinforcers 236
Timing of Reinforcer Delivery 236
Teaching Delay of Gratification— Improving Self-Control 237
Using Supplementary Reinforcers 239
Using Labeled Praise 239
Teaching Clients to Discriminate Contextual Factors 240
Determining the Magnitude and Quantity of Reinforcers 241
Incorporating Client Choice 244
Providing Contingent Reinforcement under Diverse Circumstances: At Different Times, in Many Places, and with Different People 245
Reducing, Overriding or Removing Competing Contingencies 248
Avoiding Reinforcing Behaviors Targeted for Reduction 249
Using Reinforcement Schedules to Promote and Support Lasting Change 250
Self-Management: Its Features and Function 252
Using Successful Self-Management Methods 255
Summary and Conclusions 258

12. Promoting and Supporting Group Change:Programs and Packages 262
What is the Value of Formally Arranging Group Contingencies? 263
Illustrative Group Contingencies 263
Independent Group Contingencies 263
Interdependent Group Contingencies 264
Dependent Group Contingencies 265
Advantages and Disadvantages of Dependent and Interdependent Group Contingencies 266
Reducing Unwanted Behavior by Combining Group Contingencies with Extinction 267
Defining and Applying Peer-Mediated Strategies 269
Token Systems 273
Advantages and Disadvantages of Token Systems 274
Considering Whether to Implement a Token Economy 276
Preliminary Steps in Designing a Token Economy 276
Adjusting the Token System to Local Circumstances 277
Selecting Flexible versus Fixed Earning Requirements 278
Implementing Token Economies Effectively 279
Reducing Behavior within a Token Economy 282
Methods for Maintaining Performance Improved via Token Economies 282
Summary and Conclusions 284

13 Teaching New Behavior: Shaping 285

Shaping Defined and Illustrated 286
Shaping Defined 286
Shaping Illustrated 287
Shaping the Performance of Adult Learners 291
Using Shaping Effectively 292
Familiarize Yourself with Learners' Current Repertoires 292
Choose and Apply an Ongoing Measurement System 293
Keep Your Eye on the Goal 293
Find a Starting Point and Supportive Environment 293
Select Step Size and Duration for Remaining on a Step 295
Combine Shaping with Discriminative Stimuli 296
"Shaping" with Goal-Setting 297
End Every Shaping Session on a High Note 298
Consider Combining Physical Guidance with Shaping 299
Combine Fading with Shaping 300
Illustrative Instructional Programs that Incorporate Shaping 300
Shaping and Programmed Instruction 300
Shaping and the Personalized System of Instruction (PSI) 303
Shaping and Computer-Assisted Instruction 304
Summary and Conclusions 307

14. Teaching Complex Behaviors:Chaining, Task Analyses, and Social Skills Training 308
What is a Behavior Chain? 309
Chaining Defined and Illustrated 309
Behavioral Links or Units 310
Choosing Behavioral Links 311
Linking Behavioral Chains 312
Different Classes of Chains and Their Components 314
Effectively Linking Behavioral Chains 316
Analyze the Task Precisely 317
Develop and Validate the Task Analyses 317
Use Links Already in the Learner's Response Repertoire 318
Plan an Appropriate Starting Point 320
Consider Using Supplementary Reinforcers 323
Consider Using Supplementary Discriminative Stimuli 323
Combine Shaping with Chaining 326
Combine Chaining with Fading 327
Consider Instructing Students in Pairs While Using a Time-Delay Procedure 328
Teaching Social Skills by Means of Chaining 328
A Special Application 328
Social Skills as Behavioral Chains 329
Identifying Social Skill Deficits 329
Social Skills for Academic and Job Survival 330
Using Chaining to Teach Social Skills 331
Coping With Unwanted Chains 333
Unchaining 335
Strengthening and Expanding Newly Acquired Behavior 336
Summary and Conclusions 337

15. Attaining Complex Behavior by Promoting and Supporting Antecedent Control 340
The Evolution of Stimulus Control within Individuals and Groups 341
What is Stimulus Control? 341
Establishing Discriminative Control 345
Discriminative or Stimulus Control Illustrated 345
Using Differential Reinforcement Effectively 349
How to Produce Complex Behavior Utilizing Stimulus Control 351
Contextual Variables 352
Motivating Operations Defined and Illustrated 352
Motivating Stimulus Defined and Illustrated 353
Subclasses of Motivating Operations 354
Summary and Conclusions 356

16. Selecting and Applying Methods for Promoting Stimulus Control 358
Simple Discriminations 359
Discriminations Among Multiple Stimuli 360
Identifying Obscure S^Ds 361
Control by Complex Stimuli 362
Conditional Discriminations 363
Stimulus Equivalence and Equivalence Classes 369
Stimulus Equivalence 369
Equivalence Classes 370
Reflexivity 372
Symmetry 372
Transitivity 373
Summary and Conclusions 373

17. Achieving Stimulus Control 375
Stimulus Change 376
Defined and Illustrated 376
Advantages of Stimulus Change 379
Disadvantages of Stimulus Change 379
When Stimulus Change Fails 380
Goal-Setting 381
Goal-setting Defined and Illustrated 381
Goals as Motivating Operations 382
Effective Goal-setting 383
Prompting 386
Prompting Defined and Illustrated 386
Using Prompts Effectively 386
Fluency, and Supporting Stimulus Control with Precision Teaching 393
Summary and Conclusions 397

18. Prompting Procedures and Instructional Programs 399
Using Prompting Effectively 400
Prompting by Instructing ("Telling") 400
Defined and Illustrated 400
Using the Tell Procedure Effectively 401

Direct Instruction 405
Discrete Trial Training (DTT) 407
DTT Differentiated from Free Operants 407
Selecting Free versus Discriminated Operants 408
Providing a Model: Imitative Prompts 409
Defined and Illustrated 409
Developing Modeled Behavior into Imitative Prompts or Discriminative Stimuli 410
Combining Modeling with Shaping 412
Increasing Generalized Imitative Responding 412
Video Modeling 413
Using Modeling Effectively: Model Selection 415
Using Modeling Effectively: Managing Contingencies 418
Physical Guidance 422
Defined and Illustrated 422
Using Physical Guidance Effectively 422
Summary and Conclusions 423

19. Teaching, Expanding and Refining Verbal Behavior 427
B. F. Skinner's Analysis of Verbal Behavior 429
The Duplic 431
The Duplic Defined 431
Duplic Training 431
Echoic Training 432
The Mand 433
The Mand Defined 433
Mand Training 435
The Tact 439
The Tact Defined 439
Tact Training 439
The Intraverbal 441
The Intraverbal Defined 441
Intraverbal Training 442
Listener Behavior 445
Augmentative Verbal Behavioral Strategies 447
Relational Frame Theory and Derived Relational Responding 448
Relating as an Operant 450
Relational Frame Theory in Practice 450
General Recommendations 450
Some Critical Communication Skills 451
Summary and Conclusions 451

20. Promoting Independence: Shifting and Expanding Stimulus Control 456
Reducing Prompt Dependence by Transferring Stimulus Control 457
Delayed Prompting 458
Defined and Illustrated 458
Advantages of Delayed Prompting 460
Disadvantages 460
Using Delayed Prompting Effectively 460
Graduated Prompting 461
Stimulus Fading 462

Defined and Illustrated 462
Using Fading Effectively 466
Errorless Learning 469
Defined and Illustrated 469
Using Fading to Achieve Errorless Learning 469
Using Response and Extra-Stimulus Prompting 473
Disadvantages of Errorless Learning 474
Maintaining Stimulus Control 475
Summary and Conclusions 475

21. Generalization: Expanding Stimulus Control 477
Distinguishing between the Terms *Discrimination* and *Stimulus Generalization* *479*
Stimulus Generalization and Overgeneralization 479
Distinguishing between *Stimulus Generalization* and *Response Generalization* (*Induction*) 481
Advantages and Disadvantages of Generalization 482
Stimulus Generalization 482
Response Generalization 483
Assessing for Stimulus Generalization 484
Formally Integrating Generalization Training from the Very Start 485
Request Generalization 486
Prompt Several People in Various Environments to Deliver Reinforcers 487
Teach the Behavior in Various Environments Sequentially 488
Consider Using a Generalization Map 489
Incorporate Common Stimuli Across Instructional Environments 490
Promote Fluency 492
Apply Strategies Designed to Facilitate Carry-Over into the Natural Setting 493
Correspondence Training 493
Pre-assess and Reduce Support for Functional Interfering Behavior 494
Provide Sufficient Exemplars 494
Train Loosely 496
Use Indiscriminable Contingencies 498
Continue Training 499
Teach Participants and Contingency Managers How to Promote and Support Generalization 499
Record and Graph 502
Summary and Conclusion 502

22. Maintaining Behavior: Ratio and Related Schedules of Reinforcement 504
Ratio Schedules Defined and Illustrated 506
Characteristics of Ratio-Schedule Performance 507
Ratio Schedules Usually Produce Fast Responding 508
Consistency of Performance 510
Continued Responding During Extinction 511
Advantages of Ratio Schedules 512
Using Ratio Schedules Effectively 513
Select Schedules to Sustain Desired Rates 513
Thin Gradually 514
Consider Ongoing Reinforcement Schedules Prior to Implementing Extinction to Reduce Interfering Behavior 516
Disadvantages of Ratio Schedules 516
Ratio Strain and Diminishing Performance Quality 516
Interval Schedules Often are Easier to Use 517

Changing Rates of Behavior 517
Provide Clear Instructions and Prompt Imitation of High Rates 517
Differentially Reinforcing Rates 518
Differential Reinforcement of High Rates (DRH) 518
Differential Reinforcement of Paced Responding (DRP) 519
Differential Reinforcement of Low Rates (DRL) and Diminishing Rates (DRD) 519
Differential Reinforcement of Response Variability with Lag Schedules 520
Summary and Conclusions 521

23. Maintaining Behavior by Arranging Time Based Schedules of Reinforcement 522
Interval Schedules 523
Defined and Illustrated 523
Fixed-Interval (FI) Schedules 524
Distinguishing between Fixed-Interval and Fixed-Time Schedules 524
Variable-Interval (VI) Schedules 525
Characteristics of Interval-Schedule Performance 525
Rate of Responding under Interval Schedules 526
Maintaining Rates Originally Established under Ratio Schedules 528
Consistency of Performance 529
Error Patterns 530
Managing Impulsivity 530
Responding During Extinction 531
Advantages and Disadvantages of Interval Schedules 532
Promoting Preferred Rates of Responding under Interval Schedules 533
Plan Your Reinforcement Schedule with Care 534
Provide a History Appropriate to Your Objective(s) 534
Place a Limited Hold on Responding 535
Promote Higher Responding with Differential Reinforcement of High Rates (DRH) 536
Use Discriminative Stimuli 536
Arrange Competition 539
Capitalize on Behavioral Contrast 539
Heighten Response Rates under Interval Schedules by Interspersing Easy Tasks 541
Duration Schedules 541
Chained Schedules 541
How Might Reinforcing One Response Affect Other Responses? 542
Schedule Interactions 543
Summary and conclusions 545

24. Organizational Performance Management: Systems and Supervision of Cases, Staff, and Trainees 548
Function Matters Most 549
Program Implementation 550
Be Present and Supportive 550
Use Prompts Temporarily and Only as Necessary 551
Provide Feedback on Program Implementation 552
Maximizing the Effects of Feedback for Improving Performance 552
Contingently Remove Aversive Stimuli (Negative Reinforcement) 559
Addressing Program Implementation Problems 559
Program Maintenance 560
Gradually Decrease Prompts 560

Set Goals Jointly 560
Identify and Use Various Reinforcing Sources 561
Parents 562
Clients 563
Peers 563
Supervisors, Managers, Administrators 563
Others 565
Program Generalization 565
Consider the Big Picture within the Organization 565
Contemplate the Even Broader Picture 565
Providing Supervision 566
Case Supervision 566
Staff Supervision 567
Analyst in Training Supervision (ATS) 567
Summary and Conclusions 567

25. Identifying Effective Interventions with Complex Research Designs 577
Preliminary Considerations Prior to Adopting Programs 578
How Internally Valid is the Program? 578
How Externally Valid is the Program? 579
Will Changes in Performance Impact the Bottom Line? 580
Functionally Analyzing Increases and Decreases in Behavior 580
Changing-Criterion Design 581
Changing-Criterion Designs Illustrated 581
Advantages of Changing-Criterion Design 581
Disadvantages of Changing-Criterion Design 582
Using and Demonstrating Control via the Changing-Criterion Design 582
Overall Number of Criterion Changes 585
Multiple-Probe Design 585
The Multiple-Probe Design Illustrated 586
Alternating-Treatment (Multi-Element) Designs 588
The Alternating-Treatment Design Illustrated 589
Using the Alternating-Treatment Design 590
Advantages of Alternating-Treatment Designs 593
Disadvantages of Alternating Treatment Designs 594
Conducting Component and Parametric Analyses 595
Component Analysis 595
Parametric Analysis 596
Selecting Appropriate Single-Subject Designs 597
Other Considerations with Single-Subject Designs 597
Irreversibility and Sequence Effects 597
Determining the Significance of a Demonstrated Functional Relation 601
Determining Experimental Significance 601
Other Forms of Significance 603
Making Decisions Applicable to Large Groups 604
Cost Effectiveness 605
Evaluating the Significance of Findings 605
Probing for Generality and Persistence of Change 606
Practicing Analytically 606
Summary and Conclusions 606

26. Reducing Behavior: Extinction 608
Deciding to Prevent or Reduce Behavior 609
Targeting a Behavior for Reduction 609
Nonrestrictive Procedures and the Client's Right to Effective Treatment 612
Extinction 612
Extinction Defined and Illustrated 612
Properties of Extinction 613
Situations Where "Extinguished" Behavior May Reappear 617
Behavioral Contrast 618
Using Extinction Effectively 619
Summary and Conclusions 624

27. Preventing Interfering Behavior by Enriching the Environment 626
Why Choose Alternatives to Punishment? 627
Positive Behavior Interventions 627
Antecedent Control Strategies 628
Using Stimulus-Change Procedures to Prevent Interfering Behavior 629
Removing Impediments to Goal Behaviors 629
Prompting Strategies for Preventing/Reducing Interfering Behavior 629
Presenting Rules or Instructions 629
Presenting Prompts 633
Response Interruption and Redirection (RIRD) 634
Using Activity Schedules: A Behavior Management Prevention Package Comprised of Several Antecedent Procedures 635
Preventing or Reducing Interfering Behavior by Building a More Reinforcing Environment 638
Greeting 638
Distracting with Preferred Events 639
Behavioral Momentum or High-Probability Request (or Instructional) Sequence 640
Providing Choice 641
Using Participative Goal-Setting: Promoting Success and Preventing Interfering Behaviors 642
Reducing Response Demand 643
Promoting Academic/task Success While Preventing Problem Behavior 644
The Importance of a Reinforcing Environment 646
Using Noncontingent Reinforcement (NCR) to Prevent Interfering Behavior 647
NCR Defined and Illustrated 647
Advantages and Disadvantages of NCR 650
Using NCR Effectively 652
Other Primary Prevention Methods 653
Modeling 653
Using Social Stories 655
Summary and Conclusions 656

28. Preventing and Reducing Behavior through Differential Reinforcement 658
Differential Reinforcement 660
Differential Reinforcement of Alternative (DRA) And Incompatible (DRI) Behavior 660
DRA and DRI Defined, Illustrated, and Distinguished from One Another 660
DRA and DRI: Group Management Programs 662
Advantages of DRA 663
Disadvantages of DRA 665
Using DRA Effectively 665

Differential Reinforcement of Other Behavior (DRO) 668
DRO Defined and Differentiated from DRA 668
Whole-Interval and Momentary DRO Defined and Illustrated 668
Advantages of DRO 673
Disadvantages of DRO 674
Using DRO Effectively 676
Differentially Reinforcing Lower and Diminishing Rates of Behavior 678
DRL Defined and Illustrated 678
Differential Reinforcement of Diminishing Rates (DRD) Defined and Illustrated 679
Advantages of DRL and DRD 680
Disadvantages of DRL and DRD 682
Effective Use of DRL and DRD 682
The Good Behavior Game: An Illustrative DRD Behavior-Management Package 682
Summary and Conclusions 684

29. Reducing Behavior with Negative Punishment: Response Cost and Timeout 687
Negative Punishment Defined 689
Response Cost 689
Response Cost Defined 690
Illustrations of Response Cost Programs 690
A Variation of Response Cost: Bonus Response Cost 691
Timeout from Reinforcement 692
Timeout Defined and Differentiated from Extinction and Response Cost 692
Variations of Timeout 693
Advantages and Disadvantages of Response Cost and Timeout 698
Strong and Rapid Behavioral Reduction 698
Promotes Discrimination Learning 698
Potential for Long-Lasting Effects 699
Convenient and Socially Acceptable 699
Not Universally Effective: Misuse Decreases Effectiveness 700
Punitive, Non-Constructive Contingency 700
Potential for Abuse 701
Suppression of Other Behaviors 701
Additional Disadvantages of Timeout 702
Loss of Learning Time 702
Legal and Ethical Considerations 702
Public Concern with Timeout 703
Using Response Cost and Timeout Effectively 704
Apply Immediately 704
Combine with Other Procedures 704
Create a Reinforcing Natural Environment 706
Remove as Many Reinforcers as Feasible During Timeout 706
Determine Magnitude Empirically 706
Use the Smallest Magnitude of Aversive Conditions Found to be Effective 707
Clearly Communicate Response Cost or Timeout Conditions 708
Use Consistently 709
Consider Delivering Response-Cost Points to a Peer 709
Avoid Opportunities for Self-Injury, Self-Stimulation, and Escape during Timeout 710
Monitor Implementation and Progress 710
Design the Program to Minimize Emotional Outbursts 710
Summary and Conclusions 712

30. Reducing Behavior with Positive Punishment While Minimizing Coercion 713
Illustrative Case 714
Positive Punishment Defined 714
Aversive Stimuli Defined and Illustrated 715
Unconditioned or Primary Aversive Stimuli 716
Conditioned or Secondary Aversive Stimuli 716
Intrinsic and Extrinsic Aversive Stimuli 717
Stimuli that Signal Non-reinforcement 717
Conditioning that Transforms Typically Aversive Stimuli into Reinforcers 717
Illustrative Punishment-Based Behavioral Packages 718
Contingent Effort 718
Advantages of Positive Punishment 721
Effectively Stopping Behavior 721
Halting the Behavior Rapidly; Perhaps Lastingly 721
Facilitating Adaptive Behavior 722
Disadvantages of Positive Punishment 723
Provoking Withdrawal 724
Suppressing Responses 724
Promoting Aggression 724
Promoting Inappropriate Generalization 725
Setting Conditions for Recovery or Resurgence Afterward 726
Promoting Behavioral Contrast 726
Modeling Punishment 726
Diminishing "Self-Esteem" 727
Overusing Punishment 728
Promoting Habituation to Aversive Stimuli 728
Generating Public Antipathy 728
Increasing Costs in the Short Term 729
Review of Negative Side Effects 729
Effects of Torture 730
Using Positive Punishment Effectively 730
Take Preliminary Steps Prior to Instituting a Positive Punishment Procedure 731
Reinforce Acceptable Alternative Behaviors 731
Select Functionally-Effective Aversive Consequences 733
Vary Effective Aversive Stimuli 734
Prevent Escape 734
Apply Immediately and Consistently 734
Select Appropriate Intensity 735
Combine Positive Punishment with Extinction 736
Consider and If Possible, Manage Contextual Factors 737
Program for Generalization and Maintenance 738
Monitor Regularly 738
Applying Contingent Effort 738
Select Activities Relevant to the Interfering Behavior 738
Maintain Consistency of Performance of Aversive Activities 738
Extend Duration of Aversive Activities 739
Consider Reinforcing Positive Practice 739
Right to Effective Treatment 739
Summary and Conclusions 740
