

GPX⁵⁰⁰⁰ Pro Pack

The best just got better!

Ballarat, Australia:

A 5.5 kg gold nugget was found by an Aussie prospector using a Minelab GPX 5000. At nearly 2 feet (0.6m) below gravels and clays. The prospector got his first glimpse of gold, shining for the first time in the sun. Oh what a sight! More gentle cleaning showed more gold, then more gold, then more gold, then even more gold!

"With the 15X12 Commander on the GPX 5000 you have the capability to locate the smallest of shallow gold nuggets to the other extreme, where depth and size are also attained.

A fantastic combination and all rounder."

Melbs - NSW, Australia

"I'm here to share another success story with my GPX 5000 with Coil 15" x 12" Elliptical Mono Commander and my PRO-FIND 25... I found a 130 grams nugget, when I came across a soil with a lot of garbage...Then changed the configuration to high trash, and continued detecting, dig more than 20 ferrous objects came the first reward a nugget of 23.7 grams approximately 35 cm deep..."

Diogo Minelab - Estado de Mato Grosso, Brazil

GPX⁵⁰⁰⁰ Pro Pack

GPX 5000

11" Double-D

Super quiet, wide ground coverage, added versatility with the Coil/Rx switch and Iron Reject.

11" Monoloop

Lightweight, great depth and super sensitive.

15x12" Monoloop

Deep, sensitive, stable and 25% greater coverage. The perfect patch hunting coil!
