C.	Vertical Upright	4 ea
D.	Top Bar	1 ea
E.	Bike Arm Assembly	4 ea
F.	<u>Parts Bag</u>	
	Philips Head Screw	8 ea
	Long Drywall Screw (optional)	2ea
	Drywall Anchor (optional)	2ea
	Wall Anchor (optional)	2 ea

\*Philips Head Screw Driver Required

Assembly:

**Step 1:** For this step you'll need part A, both part B, and 2 Philips head screw

We are going to attach the Legs (part B) to the Logo Plate (Part A). Line up the legs as shown in the above image (the legs face outward). Slip the leg tube over the logo plate tube and line up the holes (pictured below). Next, insert Philips screw and tighten with Philips Screw Driver. Repeat for the other Leg.

**Step 2:** For this step you'll need 2 uprights (Part C), 2 Philips head screws, and the assembled parts A/B you just created from steps above

We will now attach an upright to each side of the logo plate. These will attach like the legs above did. Slide the upright tube over the logo plate tube and line up the holes. Insert a Philips head screw and tighten with Philips screw driver. Repeat for the other upright. See pictures below for clarification.

**Step 3:** For this step you'll need the above assembly you just created, and 2 Bike Arm Assemblies (part E)

At this time, you'll want to slide a Bike Arm Assembly (Part E) onto each Upright tube. Lightly tighten each arm just to hold it in place for now.

**Step 4:** For this step you'll need the Top Bar (Part D), 2 uprights (Part C), 2 Philips head screws

For this step we'll attach the other set of Uprights (Part D) to the Top Bar. As before, slide the Upright tube over the Top Bar Tube and line up the holes. Insert a Philips head screw and tighten. Repeat for the other upright so your assembly resembles Figure 4b below.

**Step 5:** For this step you'll need the above assembly and the other two Bike Arm Assemblies (Part E)

Slide a Bike Arm Assembly (Part E) onto each Upright tube. Lightly tighten each arm just to hold it in place for now.

**Step 6:** For this step you'll need the two assemblies we've created, and the last two Philips head screws.

For this step simply slide the upper uprights into the bottom uprights, line up the holes, and insert the Philips head screws and tighten.

**Step 7:** Set Rack against Wall and Adjust Bike Arms as needed to store your bike(s) in your desired positions. You can now use your new 40090 Gear Up Lean Machine.

**Step 8 (Optional):** If you'd like to permanently mount your 40090 Lean Machine storage rack, use the Long Dry Wall Screws, Wall Anchor Brackets, and Dry Wall Anchors (if necessary). Spread the Wall Anchor Brackets apart and insert on the Top Bar. Space as desired and insert Long Dry Wall Screws through Wall Anchor Brackets and into Wall. If you are not inserting into a stud, use the provided Dry Wall Anchors. If you will be using the Dry Wall Anchors, mark on the wall in pencil where you wish to insert the mounting screws, install Dry Wall Anchors, and then mount the rack to the wall – installing the mounting screws into the drywall anchors.

### **WARNING**

***DO NOT STEP, CLIMB, OR HANG ON THE STORAGE RACK***

***DO NOT ALLOW SMALL CHILDREN OR PETS TO PLAY IN, ON, OR AROUND THE STORAGE RACK. IMPROPER INSTALLATION AND/OR USE OF THE STORAGE RACK COULD CAUSE SERIOUS INJURY AND/OR DEATH.***

User assumes total responsibility for the proper installation and use of this product.
