People who don't want the vaccine aren't "refusing" it. You don't say a person is "refusing" to take antidepressants. Or "refusing" to get married. You can decline without refusing. You decide what's best for you. Refuse is a manipulative term, loaded with unfair moral pressure.

Bill Gates is claiming that a cow emits more pollution than a car. Allow me to propose this:

I'll lock myself in my garage with a cow overnight.

Bill can lock himself in his garage with a running car.

In the morning, we can meet up and discuss results.

Donald Trump has been abused, insulted, degraded, lied about, and undermined from the moment he took the oath of office. He stands for this country, he stands for every American, and he has stood like a lion against a pack of jackals for four years. God bless [@realDonaldTrump](#)
