I finally got my shot.
And I didn't have to wait
3 weeks for my second one!

What do you know about Raggedy Ann & Andy?

IGANSKEITHU

Patented September 7, 1915 by Johnny Gruelle.
His 13 year old daughter, Marcella, was vaccinated
without his consent at school for smallpox.
She subsequently died as a result.
He created the dolls to stand as symbols for the
dead children from vaccines.
The dolls represent very real vaccine deaths and danger.
