Fauci: 'No doubt' Trump will face surprise infectious disease outbreak

January 11, 2017

 ADD TOPIC TO EMAIL ALERTS

Anthony S. Fauci, MD, director of the National Institute of Allergy and Infectious Diseases, said there is "no doubt" **Donald J. Trump** will be confronted with a surprise infectious disease outbreak during his presidency.

Fauci has led the NIAID for more than 3 decades, advising the past five United States presidents on global health threats from the early days of the AIDS epidemic in the 1980s through to the current Zika virus outbreak.

During a forum on pandemic preparedness at Georgetown University, Fauci said the Trump administration will not only be challenged by ongoing global health threats such as influenza and HIV, but also a surprise disease outbreak.
