One of Fauci's most incredible emails is the one in which he advises a family member to use hydroxychloroquin and antibiotic therapy, The same evening in which in a press conference he attacked DJT on the usefulness of hydroxychloroquin to fight the virus.

The world has always been full of traitorous slimeballs, but one as vile as Fauci has not been seen since the days of Judas.

I believe that hell will never be deep enough, hot enough, painful enough for him and his associates.
