OPERATION PAPERCLIP

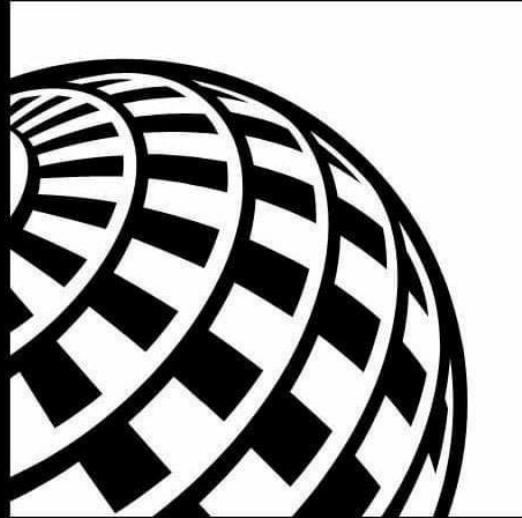

@ufohighstrangeness

Did You Know... After World War II the US government secretly launched Operation Paperclip? The Office of Strategic Services (OSS), the precursor organization to the CIA, recruited 1,500 Nazi scientists as well as Nazi Party leaders for prominent positions within the intelligence and scientific agencies within the American government. Just like that, Nazi War Criminals were given a clean slate, and prestigious careers in various American agencies such as NASA, and eventually the CIA.

CDC to Pregnant Women: Do not take Tylenol, avoid caffeine, deli meat is bad, stay away from fish, no alcohol...

Also CDC: even though the Covid injection is experimental and we don't know what harm it will cause to your baby, you should still consider getting it.
