The Tuskegee syphilis experiment was done between 1932 and 1972 by the US Public Health Service in Macon County, Alabama. The main purpose of this experiment was to observe the natural progression of untreated syphilis in rural African-American men. This was done under the guise of receiving free health care from the United States government.

Common cold

Symptoms

Symptoms of a cold include a blocked or runny nose, a sore throat and coughing.

Cold symptoms come on gradually and can include:

- a blocked or runny nose
- a sore throat
- headaches
- muscle aches
- coughs
- sneezing
- a raised temperature
- pressure in your ears and face
- loss of taste and smell

The symptoms are the same in adults and children. Sometimes symptoms last longer in children.
