HIDDEN FACT

Overpopulation is a myth. In fact, there is so much room on Earth that, if everyone lived as densely as New York City, the entire world population of 7.8 billion people could fit into the state of Alaska and give them all an acre of land and everyone would fit nicely. Overpopulation is a lie just like everything else. The lie that we are overpopulated is spread to induce fear and scarcity over the masses, and to justify ways to “lower” the population. It is a statistical fact that 50% of humans live on less than 1% of the land, and if a fraction of lawns were turned into gardens, food scarcity would be non-existent.
